- AN ACT to amend the public health law and the social services law, in relation to establishing the child health plus and school meals enrollment coordination act of 2011

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Short title. This act shall be known and may be cited as 2 the "child health plus and school meals enrollment coordination act of 3 2011".

4 S 2. Legislative intent. The legislature hereby finds and declares good health and good nutrition the fundamentals of laying a strong foun-5 б dation for early childhood development, success in school, and later 7 achievement as adults, and therefore, finds it necessary to increase enrollment in child health plus. To do so, the legislature finds it 8 9 necessary to coordinate the school meal program with child health plus. 10 Through three successful programs, which are the Child Health Plus 11 Insurance Program, the School Breakfast Program, and the School Lunch Program, New York state has shown a long-standing commitment to provid-12 ing health care to its residents, and through the efforts of the legis-13 lature, is a national leader in health care innovation. New York state 14 has made important strides in enrolling children in public health insur-15 ance by expanding eligibility to cover more children, simplifying the 16 application and re-certification processes, and establishing facilitated 17 18 enrollment centers throughout the state. Furthermore, the state has 19 attempted to improve the health of its schoolchildren by improving the

1 nutritional status of school meals and by making such meals more afford-2 able through the free and reduced price School Breakfast and School 3 Lunch programs.

4 Despite the long-standing, successful history of Child Health Plus in 5 New York state, hundreds of thousands of children are not participating 6 in this vitally necessary and important public health program. Uninsured 7 children comprise approximately 10%, or approximately 250,000 of the 2.6 8 million uninsured people in New York state. Of these 250,000 children, 9 220,000 are eligible for, but not participating in either Medicaid or 10 Child Health Plus.

11 legislature further finds that the impact on children who are The 12 uninsured, and particularly poor children, is serious because leaving 13 treatable and preventable conditions undiagnosed and untreated can have 14 lifelong adverse effects on their functioning and opportunities. Delayed 15 or missed care also cuts children off from routine health care provided primary care settings that includes child-specific, age-appropriate 16 in 17 screening, diagnosis and treatment of both chronic and acute conditions. One-third (32.9%) of uninsured children in New York state go without any 18 medical care for the entire year in a society where 87.5% of insured children receive care during the same period. Research shows that having 19 20 21 access to reliable and accountable primary health care is associated 22 with lower pediatric hospitalization rates for conditions that are 23 preventable with good primary care. In New York state, the gap in access health care is greater for minority children. Uninsured Hispanic 24 to 25 children are 10 times more likely than insured Hispanic children to not 26 receive the medical care they need. Uninsured African-American children are 20 times more likely than insured African-American children to not 27 28 receive necessary medical care.

Since the majority of children who are eligible for but not participating in Child Health Plus are attending school, the legislature finds it necessary to improve coordination between these two health and nutrition programs so that children who apply for and participate in either free or reduced price school meals are also enrolled in medicaid or Child Health Plus.

35 S 3. Subparagraph (iii) of paragraph (f) of subdivision 2 of section 36 2511 of the public health law, as added by section 44 of part A of chap-37 ter 1 of the laws of 2002, is amended to read as follows:
