Introduced by Sen. MAZIARZ -- read twice and ordered printed, and when printed to be committed to the Committee on Rules

AN ACT to amend the public authorities law, in relation to authorizing the power authority of the state of New York and the Long Island power authority to participate in public-private transmission projects to improve the state's electric transmission grid

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative findings and purpose. The legislature hereby finds and determines that:

1. The state's vital electric transmission grid is aging, congested and subject to outages caused by storms, obsolescence and the growing demands for energy by the state's residents, and such problems and conditions pose serious threats to the health, welfare, safety and economic well-being of the people of the state of New York.

2. The condition and operation of the state's electric transmission grid is a matter of state concern, and it is in the public interest to provide for the means to repair, replace, reinforce, modernize and expand the state's electric transmission grid to ensure the safe and reliable provision of electric service to the state's residents now and into the future.

3. A modernized electric transmission grid and energy highway will also encourage investments in new energy-related infrastructure and technologies, facilitate the development and integration into the power grid of renewable energy resources, and stimulate and support economic development in the state. Public-private transmission projects undertaken jointly by the owner of transmission facilities, systems and infrastructure, including the power authority of the state of New York and the Long Island power authority, which provide for the ongoing planning, construction, owning, operating, maintaining and expanding of electric transmission facilities, systems and infrastructure can serve as an
