Section 1. Legislative intent. The legislature hereby finds and declares that there is a need to address the growing number of students at the collegiate level who are suffering from psychiatric stressors that may lead to suicide. The legislature further recognizes that such psychiatric stressors also contribute to difficulties in learning and success on the collegiate level. Early detection and identification of at-risk individuals may not only prevent suicide, but may also allow such other students suffering from psychiatric stressors to get the support needed to be successful in their academic endeavors. The support necessary to achieve these goals may often require collaboration between college officials and parents and/or guardians in such a manner as to be consistent with the needs of each student.

Therefore, to achieve the above-stated goals, the legislature hereby finds and declares that every college within the state shall establish a suicide prevention program.

16 S 2. The education law is amended by adding a new section 6439 to read 17 as follows:

EXPLANATION--Matter in ITALICS (underscored) is new; matter in brackets [] is old law to be omitted.
