2013-2014 Regular Sessions

IN SENATE

April 15, 2013

Introduced by Sen. GRIFFO -- read twice and ordered printed, and when printed to be committed to the Committee on Finance

AN ACT to amend the executive law, in relation to creating the New York autism spectrum disorders treatment, training and research council and providing for the powers and duties of the council

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Intent. The legislature hereby finds and declares that autism spectrum disorders, hereinafter ASDs, currently affect approximately one in 110 children and are considered to be an "urgent public health concern" by the Centers for Disease Control and Prevention.

The legislature further finds that New York state has not responded sufficiently to this crisis. In its 2010 report, the New York state Interagency Task Force on Autism, hereinafter Task Force, identified five primary needs of the growing population of New York citizens affected by ASDs: coordination of state services, early identification, lifelong service delivery, increased dissemination of information, and coordination of research efforts. First, as a collaborative effort of 11 independent state agencies that each serve individuals impacted by ASDs, the Task Force itself exemplifies the need for coordination of research, treatment and training responsibilities. Second, while the Task Force determined that early identification and intervention were crucial to minimizing the symptoms and impact of ASDs, it reported that only eight percent of pediatricians routinely screen for ASDs and approximately 30 percent of children with ASDs do not receive the early intervention services provided by the New York State Department of Health. Third, recognizing that the thousands of children diagnosed with ASDs will soon age out of the state's educational system, the Task Force noted a dearth post-secondary training and transitional services. Fourth, the Task Force determined that individuals and families affected by ASDs would benefit from a centralized clearinghouse of relevant information, and

called for the provision of user-friendly access to such information. Finally, the Task Force reported that collaboratively determining the direction of future ASD research would best utilize available public and private funding.

The legislature therefore declares that there is a need to expand treatment, training and research with regard to ASDs -- including the enhancement of efforts to improve access to, and the efficacy of, needed services, support and treatment.
