2015-2016 Regular Sessions

IN SENATE

February 17, 2015

Introduced by Sen. SANDERS -- read twice and ordered printed, and when printed to be committed to the Committee on Consumer Protection

AN ACT to amend the general business law and the agriculture and markets law, in relation to the labeling of genetically engineered foods

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative findings and intent. The legislature finds that 1 York state consumers have the right to know whether the foods they 2 New 3 purchase have been entirely genetically engineered or partially produced with genetic engineering so they can make informed purchasing decisions. 4 5 Labeling is necessary to ensure that New York consumers are fully and 6 reliably informed about the products they purchase and consume. Further 7 the legislature finds that:

8 (a) Currently, there is no federal law that requires food producers to 9 identify whether foods were produced with genetic engineering. At the 10 same time, the United States Food and Drug Administration (FDA) does not 11 require safety studies of such foods. Unless these foods contain a known 12 allergen, the FDA does not require the developers of genetically engi-13 neered foods to consult with the agency. Consultations with the FDA are 14 entirely voluntary;

(b) Mandatory identification of foods produced with genetic engineering can provide a critical method for tracking any potential short-term and long-term health effects of consuming foods produced with genetic engineering;

19 (c) Polls consistently show that the vast majority of the public wants 20 to know if their food has been produced with genetic engineering;

(d) More than sixty countries, including Japan, South Korea, China, Australia, New Zealand, Thailand, Russia, the European Union member states, and other key United States trading partners, have laws mandating disclosure of genetically engineered foods;

EXPLANATION--Matter in ITALICS (underscored) is new; matter in brackets
[] is old law to be omitted.

LBD08813-01-5

A variety of genetically engineered crops are commercially culti-1 (e) 2 vated and sold in the United States, including corn, canola, sovbean. 3 alfalfa, and papaya. It has been estimated that cotton, sugar beets, 4 60-70% of packaged grocery products contain some materials produced with 5 genetic engineering, typically derived from genetically engineered soy, б sugar beets, and/or corn. Consumers should be provided with the informa-7 tion necessary to make informed decisions when choosing food to buy for 8 themselves and their families;

9 (f) Without disclosure, consumers with certain dietary restrictions 10 may unknowingly consume such food in violation of such dietary 11 restrictions;

12 (g) Preserving the identity, quality, and reliability of agricultural 13 products is of prime importance to our state's fiscal health;

14 (h) The cultivation of genetically engineered crops can cause serious 15 environmental impacts. For example, most genetically engineered crops are designed to withstand weed-killing herbicides. Because genetically engineered crops are more resistant to herbicides, their cultivation has 16 17 resulted in the application of millions of additional pounds of herbi-18 19 cides to the nation's farmland. The massive increase in the use of 20 herbicides has led to the emergence of herbicide-resistant weeds, which 21 have infested farm fields and roadsides, complicating weed control for 22 farmers and encouraging the use of increasingly toxic and more dangerous 23 Toxic herbicides damage the vitality of the soil, contamherbicides. 24 inate drinking water supplies, and pose health risks to consumers and 25 farm workers. New York consumers should have the ability to avoid 26 purchasing foods produced in ways that can lead to such environmental 27 harm;

(i) Conventional, non-organic farmers have a right to choose what crops they grow and many conventional farmers want to grow traditional crops developed without genetic engineering. Identifying seeds and seed stock produced with genetic engineering would protect the farmers' right to know what they are purchasing and protect their right to choose what they grow;

(j) Identifying foods produced with genetic engineering will help protect our state's export market because many of our trading partners have bans on the import and cultivation of genetically engineered seed and food as well as laws mandating the labeling of genetically engineered seed and foods;

(k) It is the intent of this act to ensure that New York consumers and farmers are fully and reliably informed about whether the food and seed they purchase and eat were produced with genetic engineering so they may choose for themselves whether to purchase and eat or use such food, seed, and seed stock;

(1) It is the intent of this act to enable improved tracking of genetically engineered food consumption and of any potential health impacts; and

47 (m) It is the intent of this act only to regulate food for human 48 consumption offered for retail sale within New York state.

S 2. The general business law is amended by adding a new section 391-t to read as follows:
