1 and supported by medical professionals; any regulation of medical care must have a legitimate purpose. Abortion is one of the safest medical procedures performed in the United States; the goal of medical regulation should be to improve the quality and availability of health care

Furthermore, the legislature declares that it is the public policy of New York State that every individual possesses a fundamental right of privacy and equality with respect to their personal reproductive decisions and should be able to safely effectuate those decisions, including by seeking and obtaining abortion care, free from discrimination in the provision of health care.

Therefore, it is the intent of the legislature to prevent the enforcement of laws or regulations that are not in furtherance of a legitimate state interest in protecting a woman's health that burden abortion access.

§ 2. The public health law is amended by adding a new article 25-A to read as follows:
