

STATE OF NEW YORK

533

2021-2022 Regular Sessions

IN ASSEMBLY

(Prefiled)

January 6, 2021

Introduced by M. of A. L. ROSENTHAL, COOK, SIMON, LAVINE, DICKENS, TAYLOR, SEAWRIGHT, GOTTFRIED, J. RIVERA, WEPRIN, QUART, WALKER, PERRY, CARROLL, RICHARDSON, CRUZ, COLTON -- read once and referred to the Committee on Correction

AN ACT to amend the correction law, in relation to the establishment of a program for the use of medication assisted treatment for inmates; and to amend the mental hygiene law, in relation to the implementation of substance use disorder treatment and transition services in jails

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. The correction law is amended by adding a new section 626 to read as follows:

§ 626. Medication assisted treatment in correctional facilities. 1. For purposes of this section "medication assisted treatment" means treatment of chemical dependence or abuse and concomitant conditions with medications requiring a prescription or order from an authorized prescribing professional.

2. (a) The commissioner, in conjunction with the office of alcoholism and substance abuse services, shall establish a program to be administered at correctional facilities within the department in the state, for the purpose of employing medication assisted treatment for inmates in such facilities who are undergoing treatment for a substance use disorder. Such program shall include all forms of medication assisted treatments approved for the treatment of a substance use disorder by the Federal Food and Drug Administration for the duration of an inmate's incarceration and shall provide an individualized treatment plan for each participant. After a medical screening, inmates who are determined to suffer from a substance use disorder, for which FDA approved addiction medications exist shall be offered placement in the medication assisted treatment program. Placement in such program shall not be

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD00451-01-1

1 mandatory. Each participating inmate shall work with an authorized
2 specialist to determine an individualized treatment plan, including an
3 appropriate level of counseling. Decisions regarding type, dosage, or
4 duration of any medication regimen shall be made by a qualified health
5 care professional licensed or certified under title eight of the educa-
6 tion law who is authorized to administer such medication in conjunction
7 with the inmate.

8 (b) i. Such program shall also include conditions for a reentry strat-
9 egy for inmates who have participated in medication assisted treatment.
10 Such strategy shall include, but not be limited to, providing each
11 participating inmate with information on available treatment facilities
12 in their area, information on available housing and employment
13 resources, and any other information that will assist the inmate in
14 continued recovery once released. Such program shall also assist the
15 inmate in Medicaid enrollment, prior to release.

16 ii. Such program shall provide participating inmates preparing for
17 release from prison with a one-week supply of any necessary medication,
18 where permissible under federal laws and regulations to continue their
19 medication assisted treatment in an effort to prevent relapse.

20 (c) Reentry planning and community supervision should include a colla-
21 borative relationship between clinical and parole staff including shar-
22 ing of accurate information regarding the inmate's participation in
23 medication assisted treatment to ensure that their medication is not
24 deemed illicit or illegal. Additionally, procedures shall be developed
25 to assist any reentrant who communicates a relapse with their parole
26 officer or who fails a drug test, to receive substance use disorder
27 support in lieu of arrest and/or incarceration.

28 3. The commissioner shall submit within one year of the effective date
29 of this section and annually thereafter, a report to the governor, the
30 temporary president of the senate and the speaker of the assembly on the
31 effectiveness of the program established pursuant to this section. Such
32 reports shall include an analysis of the impact of such program on the
33 participating inmates, including factors such as institutional adjust-
34 ment, behavior infractions, reentry rates, HIV and hepatitis C treat-
35 ment, and program participation, among related relevant factors. The
36 reports shall also include the impact on institutional safety and
37 performance and any recommendations for additional legislative enact-
38 ments that may be needed or required to improve or enhance the program
39 as determined to be appropriate by the commissioner.

40 4. Participation in the medication assisted treatment program shall
41 not be withheld from a qualified inmate. An inmate may enter into such
42 program at any time during his or her incarceration. An inmate using
43 medication assisted treatment prior to such inmate's incarceration shall
44 be eligible to, upon request by such inmate, continue such treatment in
45 the medication assisted treatment program for any period of time during
46 the duration of such inmate's incarceration. No person shall be denied
47 participation in the program on the basis of a positive drug screening
48 upon entering custody or upon intake into the program; nor shall any
49 person receive a disciplinary infraction for such positive drug screen-
50 ing. No person shall be removed from, or denied participation in the
51 program on the basis of having received any disciplinary infraction: (a)
52 before entry into the program; or (b) during participation in the
53 program.

54 § 2. Section 45 of the correction law is amended by adding a new
55 subdivision 18 to read as follows:

18. Establish standards and guidelines for a program of medication assisted treatment for inmates in county jails and/or county correctional facilities equivalent to the program established in state correctional facilities pursuant to section six hundred twenty-six of this chapter and submit an annual report consistent with the requirements of subdivision three of such section.

§ 3. The mental hygiene law is amended by adding a new section 19.18-c to read as follows:

§ 19.18-c Corrections-based substance use disorder treatment and transition services.

1. The commissioner, in consultation with local governmental units, county sheriffs, the New York city department of corrections and other stakeholders, shall implement a jail-based substance use disorder treatment and transition services program that supports the initiation, operation and enhancement of substance use disorder treatment and transition services for persons with substance use disorder who are incarcerated in jails.

2. The services to be provided by such program shall be in accordance with plans developed by participating local governmental units, in collaboration with county sheriffs, taking into account local needs and available resources. These plans must be approved by the commissioner and shall include, but not be limited to, the following:

(a) Alcohol, benzodiazepine, heroin and opioid withdrawal management;

(b) At least one formulation of every form of medication assisted treatments approved for the treatment of a substance use disorder by the Federal Food and Drug Administration necessary to ensure that each individual participating in the program receives the particular form found to be the most effective at treating and meeting their individual needs. The commissioner may allow jails a limited exemption to providing opioid full agonist treatment medications where the commissioner determines that no providers that have received the required accreditation are located within a reasonable distance of the facility. Jails that do not have the resources available to meet standards set forth herein may apply to the commissioner for a limited exception allowing such jail to enter into an agreement with a community- or jail-based program offering substance use disorder treatment and transition services to provide such services to individuals in such jails. Any such determination shall be reviewed on a regular basis;

(c) Group and individual counseling and clinical support;

(d) Peer support;

(e) Discharge planning; and

(f) Re-entry and transitional supports.

3. (a) After a medical screening, incarcerated individuals who are determined to suffer from a substance use disorder for which medication assisted treatment exists shall be offered placement in the medication assisted treatment program. Placement in such program shall not be mandatory.

(b) Each participating incarcerated individual shall work with an authorized specialist to develop an individualized treatment plan, including an appropriate level of counseling and planning for continuity of care upon return to the community.

(c) Decisions regarding type, dosage, or duration of any medication regimen shall be made by a qualified health care professional licensed or certified under title eight of the education law who is authorized to administer such medication in conjunction with the incarcerated individual.

1 (d) Participation in the medication assisted treatment program shall
2 not be unreasonably withheld from a qualified incarcerated individual.
3 An incarcerated individual using medication assisted treatment prior to
4 such individual's incarceration shall be eligible to, upon request by
5 such individual, continue such treatment in the medication assisted
6 treatment program for any period of time during the duration of such
7 individual's incarceration.

8 (e) No person shall be denied participation in the program on the
9 basis of a positive drug screening upon entering custody or upon intake
10 into the program; nor shall any person receive a disciplinary infraction
11 for such positive drug screening. No person shall be removed from, or
12 denied participation in the program on the basis of having received any
13 disciplinary infraction: (1) before entry into the program; or (2)
14 during participation in the program.

15 4. Within amounts appropriated therefor, funding shall be made avail-
16 able pursuant to criteria established by the office of alcoholism and
17 substance abuse services in consultation with local governmental units,
18 which shall take into consideration the local needs and resources as
19 identified by local governmental units, the average daily jail popu-
20 lation, the average number of persons incarcerated in the jail that
21 require substance use disorder services and such other factors as may be
22 deemed necessary.

23 5. Any jail-based substance use disorder treatment and transition
24 services program that is already in operation at the time this act shall
25 have become law and meets or exceeds the standards set forth in this
26 section shall be deemed to have met the requirements of subdivisions one
27 and two of this section. Such programs shall certify annually in writing
28 to the commissioner that they have met or exceeded the standards set
29 forth herein.

30 § 4. This act shall take effect on the one hundred twentieth day after
31 it shall have become a law. Effective immediately, the addition, amend-
32 ment and/or repeal of any rule or regulation necessary for the implemen-
33 tation of this act on its effective date are authorized to be made on or
34 before such date.
