AN ACT to amend the real property law, in relation to requiring the disclosure of lead-based paint test reports in real estate transactions

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings. The legislature hereby finds and
2 declares that lead poisoning of children persists as one of the most
3 prevalent and preventable environmental diseases in New York State.
4 Nearly 100,000 children were newly identified with levels of lead in
5 their blood at five micrograms per deciliter (mcg/dL) in New York state
6 between 2011 and 2015. Medical research indicates that children can
7 suffer permanent brain damage at blood levels even lower than 5mcg/dL,
8 and that there is no level of lead ingestion that is without adverse
9 impact. The predominant cause of lead poisoning in young children is
10 the ingestion of lead particles from deteriorating or abraded lead-based
11 paint from older and poorly maintained residences. Although New York
12 state banned the sale of lead-based paint in 1970, (l.1970, ch. 338) 74%
13 of New York's housing stock was constructed prior to 1970 and lead-based
14 paint was available outside of the state until 1978. New York state has
15 both the nation's greatest number (over 4 million units), the highest
16 percentage (55.08%) of pre-1960 and pre-1950 (41.0%) housing, and the
17 oldest housing inventory among the fifty states. At least ninety percent
18 of lead-based paint still exists in occupied housing built before 1960.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets
[-] is old law to be omitted.

LBD06488-03-1

New York state's older housing stock places residents at great risk of exposure to lead hazards, with low-income children living in older housing having the highest risk of lead poisoning. Knowledge of lead-based paint hazards, their control, mitigation, abatement, and risk avoidance is not sufficiently widespread. In addition, while federal law requires the disclosure by sellers of real property of knowledge of the existence of lead-based paint and lead-based paint hazards, and encourages potential buyers to conduct inspections for lead-based paint, these mechanisms neither mandate that such inspections take place either by sellers or buyers. This gap in disclosure requirements results in residential property being transferred without any knowledge of the potential for such property to cause lead poisoning and the attendant liabilities.

Local county health departments lack sufficient information as to which housing contains lead-based paint and the locations of such lead-based paint, resulting in less cost-effective prevention of lead poisoning, avoidable harm to children's health, and wasted public resources. The purposes of this act are to assure that properties that have not been previously tested for lead-based paint are not simply transferred to new owners without knowledge of whether there is lead-based paint present, and to better utilize the existing federal laws that mandate disclosure of lead-based paint and lead-based paint hazards and to aid in the prevention of lead poisoning. This act is not intended to and does not diminish the responsibility of buyers to carefully examine the property which they intend to purchase and public records pertaining to the property. This act is not intended to and does not limit existing responsibilities by a seller, buyer or agent concerning the condition of the property or potential liabilities or remedies at law, statute or in equity.

This act will significantly improve the transfer process and better serve the interests of all parties to a home purchase. It will increase clarity regarding the nature of the property and will provide greater certainty to contracts entered into by better informed buyers and sellers. As well, it will provide incentive to owners to voluntarily test their property prior to sale.

§ 2. The real property law is amended by adding a new article 16 to read as follows:

ARTICLE 16

LEAD-BASED PAINT DISCLOSURE ACT

Section 520. Short title.

521. Definitions.

522. Inspection of residential real property for lead-based paint prior to transfer of title.

523. Duty of agent.

524. Liability.

§ 520. Short title. This article shall be known and may be cited as the "lead-based paint disclosure act".

§ 521. Definitions. As used in this article, the following terms shall have the following meanings:

1. "Agent" shall mean a person who is licensed as a real estate broker or a real estate salesperson pursuant to section four hundred forty-a of this chapter and acting in a fiduciary capacity.

2. "Binding contract of sale" shall mean a real estate purchase contract or offer that would, upon signing by the seller and subject to satisfaction of any contingencies, require the buyer to accept a transfer of title.

1 3. "Broker" shall have the same meaning as "real estate broker"
2 defined by section four hundred forty of this chapter.

3 4. "Buyer" shall mean any entity that enters into a real estate
4 purchase contract, including but not limited to individuals, partner-
5 ships, corporations, trusts, government agencies, housing agencies,
6 Indian tribes, and nonprofit organizations.

7 5. "Lead-based paint" shall mean paint or other similar surface coat-
8 ing material containing 1.0 milligrams of lead per square centimeter or
9 greater, as determined by laboratory analysis of paint samples with all
10 layers of paint present, or by an x-ray fluorescence analyzer. If an
11 x-ray fluorescence analyzer is used, readings shall be corrected for
12 substrate bias when necessary as specified by the performance character-
13 istic sheets released by the United States environmental protection
14 agency and the United States department of housing and urban development
15 for the specific x-ray fluorescence analyzer used. X-ray fluorescence
16 readings shall be classified as positive, negative or inconclusive in
17 accordance with the United States department of housing and urban devel-
18 opment guidelines for the evaluation and control of lead-based paint
19 hazards in housing (July 2012) or successor guidelines, and the perform-
20 ance characteristic sheets released by the United States environmental
21 protection agency and the United States department of housing and urban
22 development for the specific x-ray fluorescence analyzer used. X-ray
23 fluorescence readings that fall within the inconclusive zone, as deter-
24 mined by the performance characteristic sheets, shall be confirmed by
25 laboratory analysis of paint chips, results shall be reported in milli-
26 grams of lead per square centimeter and the measure of such laboratory
27 analysis shall be definitive. If laboratory analysis is used to deter-
28 mine lead content, results shall be reported in milligrams of lead per
29 square centimeter. Where the surface area of a paint chip sample cannot
30 be accurately measured or if an accurately measured paint chip sample
31 cannot be removed, a laboratory analysis may be reported in percent by
32 weight. In such case, lead-based paint shall mean any paint or other
33 similar surface-coating material containing more than 0.009 percent of
34 metallic lead, based on the non-volatile content of the paint or other
35 similar surface-coating material. In the event that the United States
36 environmental protection agency or a successor agency, or the United
37 States department of housing and urban development or a successor agen-
38 cy, or a department or agency of the state of New York that has obtained
39 applicable authorization pursuant to 40 C.F.R. part 745 subpart O or
40 successor regulation, adopts more stringent definitions of lead-based
41 paint, such more stringent definitions shall apply for the purposes of
42 this article.

43 6. "Real estate purchase contract" shall mean any of the following:

44 (a) a contract which provides for the purchase and sale or exchange of
45 residential real property;

46 (b) a lease with an option to purchase residential real property;

47 (c) a lease-with-obligation-to-purchase agreement for residential real
48 property; or

49 (d) an installment land sale contract for residential real property.

50 7. "Residential real property" shall mean real property improved by a
51 residential dwelling erected prior to the year nineteen hundred seven-
52 ty-eight.

53 8. "Residential dwelling" shall mean a single-family dwelling, includ-
54 ing attached structures such as porches and stoops, or a single-family
55 dwelling unit within a structure that contains more than one separate
56 residential dwelling unit, used or occupied, or designed to be used or

1 occupied, wholly or partly, as the home or residence of one or more
2 persons whether or not it was or will be occupied.

3 9. "Seller" shall mean any entity that intends to engage in the trans-
4 fer of title to a buyer of residential real property, in whole or in
5 part, including but not limited to individuals, partnerships, corpo-
6 rations, trusts, government agencies, housing agencies, Indian tribes,
7 mortgage banker, lender, and nonprofit organizations. The term "seller"
8 also shall mean an entity that transfers shares in a cooperatively owned
9 project.

10 10. "Test for lead-based paint" shall mean a test for the presence of
11 lead-based paint that has been conducted through both a lead hazard risk
12 assessment and a lead-based paint inspection as defined in 40 C.F.R.
13 745.103, 24 C.F.R. 35.86, and the United States department of housing
14 and urban development guidelines for the evaluation and control of lead-
15 based paint hazards in housing (July 2012), or successor regulations and
16 guidelines, and a report prepared indicating the results of such test,
17 including the locations where tests were performed for lead-based paint
18 and lead-based paint hazards and the readings of all such tests. Such
19 test shall not be valid unless performed by a person accredited pursuant
20 to: (a) certification to conduct lead hazard risk assessment and
21 inspections by the United States environmental protection agency pursu-
22 ant to 40 C.F.R. 745.226(b) or successor regulation; or (b) certif-
23 ication by a state or tribal program authorized by the United States
24 environmental protection agency to certify individuals engaged in lead-
25 based paint activities pursuant to 40 C.F.R. 745.325 or successor regu-
26 lation or eligible to conduct the inspections required by this article.
27 For multifamily housing, the test must be conducted in accordance with
28 the United States department of housing and urban development guidelines
29 for the evaluation and control of lead-based paint hazards in housing
30 (July 2012), or successor guidelines.

31 11. "Transfer of title" shall mean delivery of a properly executed
32 instrument conveying title to residential real property and shall
33 include delivery of a real estate purchase contract that is a lease or
34 installment land sale contract.

35 § 522. Inspection of residential real property for lead-based paint
36 prior to transfer of title. 1. (a) Effective August first, two thousand
37 twenty-two, every seller of residential real property pursuant to a real
38 estate purchase contract shall deliver to a buyer or buyer's agent prior
39 to the signing by the buyer of a binding contract of sale a certificate
40 that such property has been tested for lead-based paint, and provide the
41 report of such test. A copy of the certificate containing the signature
42 of the seller and any report of a test for lead-based paint shall be
43 attached to the real estate purchase contract. A copy of such certif-
44 icate and report of such test and any subsequent reports of such tests
45 shall be filed with the state department of health in the department of
46 health in the county where such residential real property is located,
47 and such certificate shall as well be filed with the office authorized
48 under section three hundred seventy-two of this chapter to be registrar
49 of title in the county where such real property is located, and such
50 office shall not accept for filing an instrument of transfer of title
51 unless accompanied by such certificate where applicable.

52 (b) The presentation of a certificate of such test by a prior owner of
53 said property and evidence of filing such certificate and report with
54 the department of health in the county where such residential real prop-
55 erty is located, shall be deemed to be in compliance with the provisions
56 of this subdivision.

(c) In the event the seller has not received from a prior owner a certification and report of such tests as set forth in this subdivision, the costs of testing for lead-based paint and the preparation of a certificate and report thereof as provided in this subdivision shall be deductible by the transferor or grantor, up to the amount of five hundred dollars, or in a building with more than one dwelling unit up to four hundred dollars per dwelling unit tested, from the taxes imposed by sections fourteen hundred two and fourteen hundred two-a of the tax law. The transferor or grantor shall not be reimbursed for costs in excess of the total taxes imposed by sections fourteen hundred two and fourteen hundred two-a of the tax law.

2. Any provision in a real estate purchase contract or any other document related to the transfer of title in residential real property that purports to waive any right created under state or federal law for the buyer to conduct a risk assessment or inspection of the property to determine the presence of lead-based paint and/or lead-based paint hazards, or any oral agreement that purports to waive such right, is null and void as against public policy, notwithstanding that such waivers might otherwise be permitted by federal law.

3. A certificate that such property has been tested for lead-based paint shall not be required in connection with any of the following transfers of residential real property:

- (a) A transfer to a beneficiary of a deed of trust;
- (b) A transfer by a fiduciary in the course of the administration of a decedent's estate, a guardianship, a conservatorship, or a trust;
- (c) A transfer from one co-owner to one or more other co-owners;
- (d) A transfer made to the transferor's spouse or to one or more persons in the lineal consanguinity of one or more of the transferors;
- (e) A transfer between spouses or former spouses as a result of a decree of divorce, dissolution of marriage, annulment, or legal separation or as a result of property settlement, agreement incidental to a decree of divorce, dissolution of marriage, annulment or legal separation;
- (f) A transfer to or from the state, a political subdivision of the state, or another governmental entity;
- (g) A transfer by a sheriff;
- (h) A transfer pursuant to a partition action; or
- (i) A transfer of an unoccupied dwelling unit or residential property that is to be demolished, provided the dwelling unit or property will remain unoccupied until demolition and lead-safe work practices enumerated in 40 C.F.R. 745 and successor regulations, or more protective state law are followed during the demolition.

4. Nothing contained in this article is intended to prevent the parties to a contract of sale from entering into agreements of any kind or nature with respect to the physical condition of the property to be sold, including, but not limited to, agreements for the sale of real property "as is".

§ 523. Duty of agent. An agent representing a seller of residential real property as a listing broker, or, if the seller is not represented by an agent, the agent representing the buyer of residential real property and dealing with a prospective seller, shall have the duty to timely (in any event, before the buyer signs a binding contract of sale) inform each seller of the seller's obligations under this article. An agent representing a buyer of residential real property, or, if the buyer is not represented by an agent, the agent representing a seller of residential real property and dealing with a prospective buyer, shall

1 have the duty to timely (in any event, before the buyer signs a binding
2 contract of sale) inform such buyer of the buyer's rights and obli-
3 gations under this article. If an agent performs the duties and obli-
4 gations imposed upon him or her pursuant to this section, the agent
5 shall have no further duties under this article and shall not be liable
6 to any party for a violation of this article. The department of state
7 may, pursuant to section four hundred forty-one-c of this chapter,
8 revoke or suspend the license of an agent who violates this article.

9 § 524. Liability. Nothing contained in this article shall be construed
10 as limiting any existing legal cause of action or remedy at law, in
11 statute or in equity.

12 § 3. The real property law is amended by adding a new section 235-aa
13 to read as follows:

14 § 235-aa. Disclosure of lead-based paint and lead-based paint hazards.

15 1. Prior to executing a residential lease or rental agreement with a
16 tenant, the owner of real property shall provide the tenant a copy of
17 all reports of a test for lead-based paint issued or prepared pursuant
18 to section five hundred twenty-two of this chapter, and any other
19 report, within the possession or control of the owner, pertaining to
20 lead-based paint or lead-based paint hazards within the meaning of
21 section 4852d of title 42 of the United States Code and the regulations
22 thereunder. Owners who deliver a disclosure form with all required docu-
23 ments under the provisions of section 4852d of title 42 of the United
24 States Code and the regulations thereunder shall be deemed to have
25 complied with the requirements of this subdivision.

26 2. Any agreement by a lessee or tenant of premises for dwelling
27 purposes waiving or modifying his or her rights as set forth in this
28 section shall be void as contrary to public policy.

29 3. An owner who violates this section shall be liable for a civil
30 penalty not to exceed ten thousand dollars, and in addition, a penalty
31 to the tenant not to exceed the equivalent of the amount of rental
32 payments for three months plus any attorney's fees. The powers and
33 remedies set forth in this section shall be in addition to all other
34 existing legal cause of action or remedy at law, in statute or in equi-
