

STATE OF NEW YORK

5510

2025-2026 Regular Sessions

IN ASSEMBLY

February 14, 2025

Introduced by M. of A. McDONALD -- read once and referred to the Committee on Energy

AN ACT to amend the public service law and the labor law, in relation to providing net revenues from utility-owned large-scale renewable generation projects to low-income customers and authorizes utility companies to own such projects

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings and intent. 1. New York state recognizes the deleterious impacts of climate change including increasingly
2 frequent catastrophic weather events.

3
4 2. Pursuant to the New York state climate leadership and community
5 protection act (CLCPA), New York state seeks to dramatically reduce
6 greenhouse gas emissions and move its electric generation from fossil
7 fuel-based generation to renewable-based generation. New York state has
8 mandated that seventy percent of electricity come from renewable energy
9 sources by year 2030 and one hundred percent of electricity come from
10 carbon neutral sources by 2040.

11 3. Further, New York state recognizes that the current pace of development of in-state renewable energy resources is insufficient to meet
12 the state's statutory renewable generation goals on schedule.

13 4. Because New York state seeks to accomplish these energy-related
14 goals and standards as soon as practicable allowing regulated utilities
15 to own and operate renewable generation is essential to achieving such
16 goals and to provide a consistent and affordable supply of carbon-free,
17 renewably generated electricity by 2030, through 2050 and beyond.

18 5. New York state seeks to continue to develop in-state renewable
19 energy projects that will drive down costs, benefit customers receiving
20 retail electric delivery particularly those customers who are low to
21 moderate income.
22

EXPLANATION--Matter in italics (underscored) is new; matter in brackets
[-] is old law to be omitted.

LBD04103-01-5

6. New York state has a proprietary interest in these projects being efficiently built and operated without unnecessary disruptions, which justifies the use of project labor agreements and labor peace agreements.

§ 2. The public service law is amended by adding a new section 66-x to read as follows:

§ 66-x. Regulated large scale renewable generation. 1. In order to support the state in meeting state energy-related goals and standards, corporations subject to the provisions of this article providing retail electric service shall be authorized to own and operate renewable energy generating facilities in New York state. Such corporations shall be authorized to own and operate such facilities individually or in partnership with other persons doing business in New York.

2. A corporation owning and operating a renewable energy generation facility pursuant to this section shall provide all net revenues from such facility to low-income customers in the form of bill credits, which shall be in addition to any other program or benefit offered by the corporation to assist such customers.

3. In addition to the provisions of subdivision two of this section, any renewable energy generating facility owned by such a corporation shall be:

(a) subject to commission oversight in order to ensure that: (i) the power generated at such facilities remains in-state for the benefit of customers and the state; (ii) the power generated at such facilities shall not be exported out-of-state; and (iii) any repowering of such generating facilities shall comply with all requirements of this section;

(b) built, pursuant to a competitive third-party bidding process, which shall be issued by the corporation;

(c) subject to section sixty-six-r of this article and section two hundred twenty-four-d of the labor law; and

(d) owned and operated in a manner that provides beneficial cost and rate impacts to customers.

4. The commission shall establish a generation capacity limit for the total generation capacity owned by corporations pursuant to this section. The total generation capacity shall not exceed twenty-five percent of the total generation capacity needed to achieve the renewable energy goals described in section sixty-six-p of this article.

5. The commission shall issue such orders, rules and regulations as may be necessary and appropriate to implement this section.

§ 3. Section 66-r of the public service law, as added by section 2-a of part AA of chapter 56 of the laws of 2021, subdivision 1-a as added and subdivision 3 and paragraph (a) of subdivision 4 as amended by section 32 of part 0 of chapter 58 of the laws of 2024, is amended to read as follows:

§ 66-r. Requirements for certain renewable energy systems. 1. For the purposes of this section, a "covered renewable energy system" means a renewable energy system, as such term is defined in section sixty-six-p of this article, with a capacity of greater than five megawatts alternating current and which involves the procurement of renewable energy credits by a public entity, or a third party acting on behalf and for the benefit of a public entity. "Covered renewable energy system" shall also include any generation facility authorized pursuant to section sixty-six-x of this article.

1-a. For the purposes of this section, an "other covered project" means: (a) any "thermal energy network" as defined by subdivision twen-

ty-nine of section two of this chapter; (b) any offshore wind supply chain project, including but not limited to port infrastructure, primary component manufacturing, finished component manufacturing, subassembly manufacturing, subcomponent manufacturing, or raw material producers, or a combination thereof receiving direct funding from the New York state energy research and development authority pursuant to an award under a New York state energy research and development authority solicitation; or (c) a "major utility transmission facility" as such term is defined by section one hundred twenty of this chapter or "major electric transmission facility" as defined by article VIII of this chapter.

2. For purposes of this section, "public entity" shall include, but shall not be limited to, the state, a local development corporation as defined in subdivision eight of section eighteen hundred one of the public authorities law or section fourteen hundred eleven of the not-for-profit corporation law, a municipal corporation as defined in section one hundred nineteen-n of the general municipal law, an industrial development agency formed pursuant to article eighteen-A of the general municipal law or industrial development authorities formed pursuant to article eight of the public authorities law, and any state, local or interstate or international authorities as defined in section two of the public authorities law; and shall include any trust created by any such entities.

3. The commission shall require that the owner of the covered renewable energy system or other covered project, or a third party acting on the owner's behalf, as an ongoing condition of any renewable energy credits agreement with a public entity, or as an ongoing condition of its authorization to operate and support the state in meeting energy-related goals, shall stipulate to the fiscal officer that it will enter into labor peace agreements with any bona fide labor organizations that either are actively representing employees providing necessary operations and maintenance services for the renewable energy system at the time of such agreement or provides notice that it is attempting to represent any employees in any titles who provide, or who will provide, necessary operations and maintenance services for the renewable energy system employed in the state; provided, however, this subdivision shall not apply to any covered projects defined in paragraph (c) of subdivision one-a of this section. The maintenance of such a labor peace agreement, or agreements, which cover all classes of operations and maintenance employees, shall be an ongoing material condition of any continuation of payments under a renewable energy credits agreement or authorization by the commission. For purposes of this section "labor peace agreement" means an agreement between an entity and labor organization that, at a minimum, protects the state's proprietary interests by prohibiting labor organizations and members from engaging in picketing, work stoppages, boycotts, and any other economic interference with the relevant renewable energy system. "Renewable energy credits agreement" shall mean any public entity contract that provides production-based payments to a renewable energy project as defined in this section.

4. (a) (1) Any public entity, in each contract for construction, reconstruction, alteration, repair, improvement or maintenance of a covered renewable energy system which involves the procurement of a renewable energy credits agreement by a public entity, or a third party acting on behalf and for the benefit of a public entity, the "public work" for the purposes of this subdivision, shall ensure that such contract shall contain a provision that the iron and steel used or supplied in the performance of the contract or any subcontract thereto

1 shall be produced or made in whole or substantial part in the United
2 States, its territories or possessions. In the case of an iron or steel
3 product all manufacturing must take place in the United States, from the
4 initial melting stage through the application of coatings, except metal-
5 lurgical processes involving the refinement of steel additives.

6 (2) Any corporation in each contract for construction, reconstruction,
7 alteration, repair, improvement or maintenance of a covered renewable
8 energy system authorized pursuant to section sixty-six-x of this arti-
9 cle, or a third party acting on behalf and for the benefit of the corpo-
10 ration, the "public work" for the purposes of this subdivision, shall
11 ensure that such contract shall contain a provision that the structural
12 iron and structural steel used or supplied in the performance of the
13 contract or any subcontract thereto and that is permanently incorporated
14 into the public work, shall be produced or made in whole or substantial
15 part in the United States, its territories or possessions. In the case
16 of a structural iron or structural steel product all manufacturing must
17 take place in the United States, from the initial melting stage through
18 the application of coatings, except metallurgical processes involving
19 the refinement of steel additives. For the purposes of this subdivision,
20 "permanently incorporated" shall mean an iron or steel product that is
21 required to remain in place at the end of the project contract, in a
22 fixed location, affixed to the public work to which it was incorporated.
23 Iron and steel products that are capable of being moved from one
24 location to another are not permanently incorporated into a public work.

25 (b) The provisions of paragraph (a) of this subdivision shall not
26 apply if the head of the department or agency or corporation under
27 subparagraph one of such paragraph (a) constructing the public works, in
28 ~~[his or her]~~ the head's sole discretion, determines that the provisions
29 would not be in the public interest, would result in unreasonable costs,
30 or that obtaining such steel or iron in the United States would increase
31 the cost of the contract by an unreasonable amount, or such iron or
32 steel, including without limitation structural iron and structural steel
33 cannot be produced or made in the United States in sufficient and
34 reasonably available quantities and of satisfactory quality. The head of
35 the department or agency constructing the public works shall include
36 this determination in an advertisement or solicitation of a request for
37 proposal, invitation for bid, or solicitation of proposal, or any other
38 method provided for by law or regulation for soliciting a response from
39 offerors intending to result in a contract pursuant to this subdivision.
40 The provisions of paragraph (a) of this subdivision shall not apply for
41 equipment purchased by a covered renewable energy system prior to the
42 effective date of this chapter. The provisions of subparagraph two of
43 paragraph (a) of this subdivision shall not apply for equipment
44 purchased by a covered renewable energy system prior to the effective
45 date of such subparagraph.

46 (c) The head of the department or agency constructing the public works
47 may, at ~~[his or her]~~ the head's sole discretion, provide for a solicita-
48 tion of a request for proposal, invitation for bid, or solicitation of
49 proposal, or any other method provided for by law or regulation for
50 soliciting a response from offerors intending to result in a contract
51 pursuant to this paragraph involving a competitive process in which the
52 evaluation of competing bids gives significant consideration in the
53 evaluation process to the procurement of equipment and supplies from
54 businesses located in New York state.

55 5. Whenever changes are proposed to any public procurement process
56 involving the program described in subdivision two of this section, the

1 commission shall make simultaneous recommendations to the temporary
2 president of the senate and speaker of the assembly, regarding necessary
3 changes to this section, if any, in meeting the goals outlined in the
4 legislative findings and intent of [~~the chapter by which this section~~
5 ~~was enacted~~] part AA of chapter fifty-six of the laws of two thousand
6 twenty-one.

7 § 4. Subdivision 1 of section 224-d of the labor law, as amended by
8 section 31 of part 0 of chapter 58 of the laws of 2024, is amended to
9 read as follows:

10 1. For purposes of this section, a "covered renewable energy system"
11 means (a) a renewable energy system, as such term is defined in section
12 sixty-six-p of the public service law, with a capacity of one or more
13 megawatts alternating current and which involves the procurement of
14 renewable energy credits by a public entity, or a company or corporation
15 provided in subdivisions twenty-three and twenty-four of section two of
16 the public service law, or a third party acting on behalf and for the
17 benefit of a public entity; (b) any "thermal energy network" as defined
18 by subdivision twenty-nine of section two of the public service law; (c)
19 any offshore wind supply chain project, including but not limited to
20 port infrastructure, primary component manufacturing, finished component
21 manufacturing, subassembly manufacturing, subcomponent manufacturing, or
22 raw material producers, or a combination thereof receiving direct fund-
23 ing from the New York state energy research and development authority
24 pursuant to an award under a New York state energy research and develop-
25 ment authority solicitation; [~~or~~] (d) a "major utility transmission
26 facility" as such term is defined by section one hundred twenty of the
27 public service law; or (e) any "generation facility" as described in
28 section sixty-six-x of the public service law.

29 § 5. No later than sixty days after the effective date of this act,
30 the public service commission shall commence a proceeding necessary and
31 appropriate to implement the provisions of section 66-x of the public
32 service law.

33 § 6. This act shall take effect immediately.
