CENSUS DATA: The number of members who will benefit in the future from this proposed legislation is unknown. The estimates presented herein are based on preliminary census data collected as of June 30, 2025. The census data for the potentially impacted population used to develop the average costs is summarized below.

	NYCERS
Active Members	
- Number Count:	168
- Average Age:	41.3
- Average Service:	9.6
- Average Salary:	84,800

IMPACT ON MEMBER BENEFITS: Currently, active Tier 4 or Tier 6 members of NYCERS who are employed as Deputy Sheriffs and become disabled due to HIV, Tuberculosis, or Hepatitis would generally be eligible for an applicable ordinary disability retirement after attaining 10 years of service. The disability benefit is a lifetime payment equal to the greatest of 1/3 of Final Average Salary (FAS), 1/60th of FAS times service, or the service retirement benefit, if eligible.

Under the proposed legislation, the performance of duty disability benefit for Tier 4 or Tier 6 Deputy Sheriff members who are disabled from HIV, Tuberculosis, or Hepatitis would be equal to 75% of FAS with an offset for Workers' Compensation.

The ordinary death benefit for NYCERS Deputy Sheriffs is a lump sum payment generally equal to three times the member's salary, plus a refund of member contributions.

The performance of duty death benefit would generally be equal to a lifetime benefit of 50% of a member's wages earned during their last

year of service, plus, if applicable, the Special Accidental Death Benefit (SADB) payable under General Municipal Law section 208-f.

SADB for Deputy Sheriffs was enacted by Chapter 720 of the Laws of 2023 and all accidental deaths are assumed to qualify for SADB.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems.

The number of members who will benefit from this proposed legislation is unknown. The cost of this proposed legislation could vary greatly depending on the number of future members who benefit and on their length of service, age, and salary history. In particular, the increase would be greater for a member who is not yet eligible for an ordinary disability benefit when disabled.

The estimated financial impact for disabled members has been calculated assuming 50% would have retired under the current ordinary disability benefit, and 50% would have continued working if the proposed legislation were not passed.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

STATEMENT OF ACTUARIAL OPINION: Marek Tyszkiewicz and Gregory Zelikovsky are members of the Society of Actuaries and the American Academy of Actuaries. We are members of NYCERS, but do not believe it impairs our objectivity, and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. To the best of our knowledge, the results contained herein have been prepared in accordance with generally accepted actuarial principles and procedures and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.
