Section 1. The insurance law is amended by adding a new section 3246 to read as follows:

(B) Reasonable estimates of any negotiated price concessions, fees and other administrative costs that are passed through, or are reasonably anticipated to be passed through, to the insurer and serve to reduce the insurer's liabilities for a prescription drug.

(b) An enrollee's defined cost sharing for each prescription drug shall be calculated at the point of sale based on a price that is reduced by an amount equal to at least eighty-five percent of all rebates received, or to be received, in connection with the dispensing or administration of the prescription drug. Nothing shall preclude an insurer from decreasing an enrollee's defined cost sharing by an amount greater than that required under this subsection.

(c) An insurer shall submit to the superintendent by the first of January of each year a certification in a form to be established by the superintendent attesting that it has complied with the requirements of subsection (b) of this section for the prior calendar year.

(d) In complying with the provisions of this section, an insurer or its agents shall not publish or otherwise publicly reveal information regarding the actual amount of rebates an insurer receives on a product or therapeutic class of products, manufacturer, or pharmacy-specific basis. Such information shall be exempt from disclosure under section eighty-seven of the public officers law and shall not be disclosed directly or indirectly, or in a manner that would allow for the identification of an individual product, therapeutic class of products, or manufacturer, or in a manner that would have the potential to compromise the financial, competitive, or proprietary nature of such information. An insurer shall impose the confidentiality protections of this subdivision on any vendor or downstream third-party that performs health care or administrative services on behalf of the insurer that may receive or have access to rebate information.
