BACKGROUND: Mr. Smith retired with an Ordinary Disability Retirement from POLICE on August 12, 2009. As of June 30, 2025, Mr. Smith receives an annual pension of \$68,924 per year payable under the maximum form of payment (i.e., payable to him as long as he is alive).

If the proposed legislation is enacted, Mr. Smith's retirement allowance would be recalculated as an Accident Disability Retirement and his annual pension would increase to \$114,171 per year. This increase would apply prospectively as well as retroactively to Mr. Smith's original date of retirement.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems.

For purposes of calculating the impact of the proposed legislation, it has been assumed that the retroactive increase in benefits would be paid without interest.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.
