AN ACT to amend the public health law, the real property law, the tax law, the state finance law, the multiple dwelling law, the multiple residence law, the social services law, and the insurance law, in relation to enacting the "childhood lead poisoning prevention and safe housing act of 2010"; and to repeal certain provisions of the public health law relating thereto

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. This act shall be known and may be cited as the "childhood
2 lead poisoning prevention and safe housing act of 2010".
3 S 2. Legislative findings and purposes. 1. (a) Lead poisoning of
4 children persists as one of the most prevalent and preventable environ-
5 mental diseases in New York. At least 10,000 children were newly iden-
6 tified with levels of lead in their blood at 10 micrograms per deciliter
7 (ug/dl) in New York state in 2001. Moreover, only about one-third of
8 children are receiving the lead screenings that are required by law and
9 therefore, the actual number of children affected by the ingestion of
10 lead is undoubtedly significantly greater than reported. Prevention is
11 the only effective way to protect children from irreversible damage.
12 Unless lead poisoning is prevented, elevated blood lead levels will
13 result in impairment of the ability to think, concentrate, and learn.
14 (b) Medical research indicates that children can suffer permanent,
15 irreparable damage at blood levels even lower than 10 ug/dl, and that

[] is old law to be omitted.

1 there is no level of lead ingestion which is without adverse impact.
2 Medical research also indicates that fetal injuries from lead paint can
3 occur if women have elevated blood levels during pregnancy. Because of
4 this, intervention measures that wait until children have been exposed
5 have limited benefits, and the pursuit of primary prevention, which
6 means eliminating lead hazards before children are exposed, has been
7 recommended by the United States centers for disease control and
8 prevention and promoted by leading experts in the field as a critical
9 course of action to protect the health of young children.

10 (c) The predominant cause of lead poisoning in children is the inges-
11 tion of lead particles from deteriorating or abraded lead-based paint
12 from older and poorly maintained residences.

13 (d) Deteriorating lead-based paint or excessive amounts of lead-conta-
14 minated dust in these poorly maintained homes endangers the intellectual
15 and emotional development and physical well being of affected children.
16 In addition, unsafe work practices that inadequately control lead dust
17 in the repair or renovation of older homes can cause substantial lead
18 hazards.

19 (e) Although New York state banned the sale of lead paint in 1970,
20 (l.1970, ch. 338) seventy-four percent of New York's housing stock was
21 constructed prior to 1970. At least ninety percent of lead-based paint
22 still remaining in occupied housing exists in units built before 1960.
23 New York state has both the largest percentage and the largest absolute
24 number of older housing units with lead paint in the nation.

25 (f) The dangers posed by lead-based paint can be substantially
26 reduced, although not eliminated, by taking measures to prevent paint
27 deterioration and limiting children's exposure to paint chips and lead
28 dust.

29 (g) The deterioration of lead-based paint in older residences results
30 in increased expenses each year for the state of New York in the form of
31 special education and other education expenses, medical care for lead-
32 poisoned children, and expenditures for delinquent youth and others
33 needing special supervision.

34 (h) Older housing units remain an important part of New York's housing
35 stock, particularly for those of modest or limited incomes. The problem
36 of lead-based paint in housing affects urban, suburban and rural areas
37 of the state.

38 (i) The existing housing codes and enforcement systems in most juris-
39 dictions do not include primary prevention measures for lead hazards and
40 have proven ineffective in encouraging widespread lead-based paint
41 hazard abatement, mitigation, and control.

42 (j) The financial incentives currently in place have not proven suffi-
43 cient to motivate landlords and other property owners to undertake wide-
44 spread and effective lead-based paint hazard abatement, mitigation, and
45 control; moreover low and moderate income property owners may not have
46 access to the resources to eliminate or reduce substantially lead
47 hazards.

48 (k) Insurance companies are reluctant to provide coverage to property
49 owners in the absence of evidence that lead hazards have been appropri-
50 ately addressed.

51 (l) Knowledge of lead-based paint hazards, their control, mitigation,
52 abatement, and risk avoidance is not sufficiently widespread, especially
53 outside urban areas.

54 2. The purposes of this act are: (a) to increase the supply of afford-
55 able rental housing in the state of New York in which measures have been

1 taken to eliminate or substantially reduce the risk of childhood lead
2 poisoning;

3 (b) to ensure that New York's response to lead-based paint hazards
4 focuses on primary prevention as the essential tool to combat childhood
5 lead poisoning, and thus to substantially reduce, and eventually elimi-
6 nate, the incidence of childhood lead poisoning in the state of New
7 York;

8 (c) to establish and make enforcement of lead hazard control standards
9 in the state of New York more certain and more effective;

10 (d) to improve public awareness of lead safety issues and to educate
11 both property owners and tenants about practices that can reduce the
12 incidence of lead poisoning;

13 (e) to provide access to the resources for property owners and land-
14 lords who commit to undertake specified lead hazard reduction measures;
15 and

16 (f) to facilitate the availability and affordability of liability
17 insurance protection to those landlords and other owners who undertake
18 specified lead hazard reduction measures.

IF, SUBSEQUENT TO DELIVERY OF SUCH NOTICE, THE OWNER DOES NOT RECEIVE SUCH WRITTEN RESPONSE BY FEBRUARY FIFTEENTH, AND DOES NOT OTHERWISE HAVE ACTUAL KNOWLEDGE AS TO WHETHER A PERSON AT RISK RESIDES THEREIN, THEN THE OWNER SHALL AT REASONABLE TIMES AND UPON REASONABLE NOTICE INSPECT THAT OCCUPANT'S DWELLING UNIT TO ASCERTAIN THE RESIDENCY OF A PERSON AT RISK AND, WHEN NECESSARY, CONDUCT AN INVESTIGATION IN ORDER TO MAKE THAT DETERMINATION. WHERE, BETWEEN FEBRUARY SIXTEENTH AND MARCH FIRST OF THAT YEAR, THE OWNER HAS MADE REASONABLE ATTEMPTS TO GAIN ACCESS TO A DWELLING UNIT TO DETERMINE IF A PERSON AT RISK RESIDES IN THAT DWELLING UNIT AND WAS UNABLE TO GAIN ACCESS, THE OWNER SHALL NOTIFY THE DEPUTY COMMISSIONER OR THE DEPUTY COMMISSIONER'S LOCAL DESIGNEE OF THAT CIRCUMSTANCE.

26 SUCH A CONDITION EXISTS, OR WHEN AN OCCUPANT MAKES A COMPLAINT TO THE
27 OWNER CONCERNING A CONDITION THAT THE OWNER KNOWS OR SHOULD KNOW IS
28 REASONABLY FORESEEABLE TO BE CONDUCIVE TO LEAD POISONING.

29 (C) IN ADDITION TO ANY INVESTIGATIONS OR INSPECTIONS REQUIRED UNDER

54 RECEIPT OF A COMPLAINT OR OTHER SUCH EVENT TRIGGERING AN INSPECTION, AND
55 REQUIRE FOR EACH SUCH AREA OF HIGH RISK THAT THE COUNTY COMMISSIONER OF
