AN ACT to amend the New York state urban development corporation act, in relation to creating the bioscience facilities development program

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative findings and declarations. The legislature
2 finds that New York state has many assets that are critical to the
3 growth of the biotechnology industry.
4 The legislature also finds that New York state has an extensive
5 academic research base, a highly skilled labor pool and access to finan-
6 cial institutions oriented toward biotech development.
7 The legislature further finds that even with many of the critical
8 elements for growing a biotechnology cluster, New York for all intents
9 and purposes has been eclipsed by a number of other regions in the coun-
10 try.
11 Further, the legislature finds that while start-up companies are
12 established in New York, companies that are poised for rapid expansion
13 have left New York for regions that have developed vigorous biotech and
14 policies that deliberately invite, nurture and facilitate the expansion
15 of the industry and proactively addressing the biotech companies' need
16 for affordable laboratory space.
17 The legislature declares that biotechnology is an important economic
18 development industry for the state and that the critical impediment to
19 the successful growth of a biotech cluster in New York state is access
