AN ACT to amend the public health law, in relation to creating a food
security, empowerment and economic development program

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEM-
BLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative intent. The legislature finds there is a need
2 for community economic development to improve the food system in areas
3 where there is an inadequate food supply and many residents who rely on
4 fluctuating government and private food assistance. There is a need to
5 develop food resources and businesses in these communities that provide
6 higher quality, more accessible food. The legislature also finds that
7 local farmers and food producers can and should benefit from these
8 efforts.
9 The legislature further finds that as the federal government and New
10 York state attempt to reduce dependency on government, there is a need
11 to support families leaving public assistance for work. One approach to
12 increasing work opportunities and addressing the food needs in these
13 communities is through the development of "community food security",
14 which is defined as people successfully obtaining an acceptable, nutri-
15 tious diet using local non-emergency sources.
16 Community food security projects are designed to meet the food needs
17 of low income people, increase the self-reliance of communities in
18 providing for their own food needs, and promote comprehensive responses
19 to local food, farm and nutrition issues. For example, these projects
20 provide training in urban gardening and sales, assist entrepreneurs

1 starting micro-enterprises, support farmers' markets in distressed
2 neighborhoods and provide food-based educational opportunities for
3 schools.

4 The legislature supports the goals of self-reliance, community-based
5 economic development, profitable local agriculture, improved nutrition
6 and helping families and individuals help themselves. Therefore, the
7 legislature finds that the creation of a community food security program
8 for New York state will benefit struggling working families and their
9 communities, provide new markets for family farmers, create food-based
10 jobs and small businesses, and ensure healthier citizens and neighbor-
11 hoods.

13 read as follows:
