AN ACT to amend the public health law, in relation to requiring cigarette manufacturers to disclose the chemical substances and product design characteristics used in the manufacture of cigarettes

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative findings. It has been the policy of the state
2 to guarantee and facilitate the public right to know concerning health
3 risks that may be encountered from manufactured products and at the
4 workplace. The legislature finds that literally thousands of chemical
5 substances are routinely utilized in the manufacture of cigarettes as
6 burn retardants, preservatives, flavor enhancers and for other aesthetic
7 purposes and that such chemicals, as well as product design character-
8 istics, may have toxic effects for both smokers and nonsmokers. There-
9 fore, the legislature further finds that the public has a right to know
10 what chemical substances and product design characteristics are used in
11 the manufacture of cigarettes and what toxic effects, if any, these
12 additives and characteristics have been found to have or are suspected
13 of having.
