FISCAL NOTE.--This bill would require that any assets of the Common Retirement Fund invested in any company doing business in or with Sudan or with agencies or instrumentalities be divested not later than three years following the date of enactment of this legislation. This bill would decrease the number of investment choices available for investment by the Common Retirement Fund. Presumably this could lead to a lower rate of return on the Fund's investments, decreasing the probability of achieving our actuarial assumed rate of return, currently at 8%. A diminished rate of return would cause an increase in the contributions of the State of New York and the participating employers in the New York State and Local Employees' Retirement System and the New York State and Local Police and Fire Retirement System. There also would be additional administrative costs to identify companies that are doing business in or with Sudan.
