When HIV/AIDS infected 5 persons commit such actions as having unprotected sex or sharing needles 6 without the consent of their partners, they endanger the public health and frustrate the efforts of health officials to contain and, hopefully, 7 8 reverse the spread of HIV/AIDS.

9 The legislature further finds that in order to allow the victims of 10 alleged sex crimes or crimes which endanger their health to obtain the 11 most effective health care treatment, the HIV status of their offenders 12 must be determined.

13 The legislature further finds that the increasing reports of acquired 14 immune deficiency syndrome, human immunodeficiency virus, tuberculosis 15 and hepatitis in state correctional facilities have reached an alarming level. These inmates and others who may have an undiagnosed case of any 16 of these syndromes, diseases or viruses are extremely detrimental to the 17 health, safety and welfare of the correction officers and other staff 18 who work in such facilities as well as inmates who are 19 incarcerated 20 therein. In order to maintain proper security and working conditions, 21 the legislature hereby declares that all inmates presently under
