Section 1. Legislative findings. The cost-sharing, deductibles and co-insurance obligations for certain drugs have become cost prohibitive for persons trying to overcome serious diseases such as cancer, multiple sclerosis, rheumatoid arthritis, hepatitis C, and hemophilia. drugs are typically new, produced in lesser quantities than other drugs, and not available as less expensive brand name or generic prescription drugs. Some health insurance plans and policies have established unique categories or specialty tiers for these drugs, sometimes referred to as Tier IV or Tier V. Patients under these plans are required to pay a percentage of the cost of these high-priced drugs, rather than the traditional co-payment amounts for generic, preferred brand, and nonpreferred brand prescription drugs, often covered by Tier I, Tier II, and Tier III plans and policies, respectively. As a result, patients covered under Tier IV or Tier V plans or policies must pay thousands of dollars in out-of-pocket costs for drugs critical for their treatment. It is in the public interest to help patients to afford necessary

prescription drugs by prohibiting cost-sharing, deductibles and co-insurance obligations by patients that exceed payments for non-preferred brand prescription drugs or the equivalent thereof. It is not the intent of this legislation to preclude plans or policies from categorizing drugs used in the treatment of these common diseases as brand name prescription drugs or generic prescription drug equivalents.

EXPLANATION--Matter in ITALICS (underscored) is new; matter in brackets [] is old law to be omitted.

The extraordinary disparity in cost-sharing, deductible and co-insurance burdens imposed on patients whose life and health depend on these drugs constitutes serious and unjustified discrimination based on their disease or disability.

This legislation is intended to provide patients more affordable access to prescription drugs essential for their treatment of cancer, multiple sclerosis, rheumatoid arthritis, hepatitis C, hemophilia and other diseases.
