2009-2010 Regular Sessions

IN ASSEMBLY

(PREFILED)

January 7, 2009

- Introduced by M. of A. PAULIN, BRADLEY, ARROYO, BENEDETTO, ESPAILLAT, N. RIVERA, SCHROEDER -- Multi-Sponsored by -- M. of A. ALFANO, BARRA, BRENNAN, DESTITO, DIAZ, ERRIGO, MILLER, WRIGHT -- read once and referred to the Committee on Education
- AN ACT to require annual reports and create a regents review board to audit assessments used to determine grade promotion, graduation or adequate yearly progress for validity, reliability, alignment to standards and appropriateness of use

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative findings. The legislature finds that the state 1 2 board of regents has established five examinations to authenticate that 3 regents diploma may be conferred upon a high school student. Examinaа 4 tions established by the state board of regents in mathematics and English language arts to be administered in the third through eighth 5 б grades, as well as in high school, are utilized to determine whether or 7 not a school, and ultimately a school district, has made adequate yearly 8 progress (AYP) under the federal No Child Left Behind Act (NCLB). Schools or districts that fail to demonstrate AYP are subject to a 9 10 series of sanctions culminating in closing and reorganizing the schools 11 in question. This increases the emphasis on state mandated standardized 12 examinations having real, high stakes consequences for both students and 13 schools. Therefore, it is essential that these examinations be valid and 14 reliable measures of student attainments in learning and that they be a demonstratively scientifically accurate means of determining a student's 15 readiness for graduation or grade promotion, 16 and a school's overall 17 performance. Holding students and educators to high standards demands 18 holding tests to high psychometric and curricular standards.

19 Furthermore, the federal NCLB requires that assessments used for grad-20 uation, promotion and to determine a school's AYP be "valid and reli-

able, and be consistent with relevant, nationally recognized profes-1 2 sional and technical standards. " 20 U.S.C. sec. 6311(b)(3)(C)(iii). 3 While much effort has been made by the commissioner of education and 4 the state board of regents to develop and disseminate testing instruments used for graduation, promotion and determination of AYP, it is 5 6 necessary to ensure that these assessments meet professional standards 7 for validity, reliability, alignment to learning standards and appropri-8 ateness of use. As a preliminary matter, a technical manual does not exist for the various examinations, a basic requirement of the guide-9 10 lines of the American Educational Research Association (AERA), the Amer-11 ican Psychological Association (APA) and the National Council on Measurements in Education (NCME) for scientifically valid, reliable and appropriate test use. The AERA, APA and NCME are the primary national 12 13 14 organizations that set standards for the psychometric and testing 15 professions and the AERA is a primary resource for examining the curricular alignment of tests. The commissioner of education must therefore be required to produce the necessary indicia of test validity, reliability, 16 17 18 alignment to the state learning standards and appropriateness of use for 19 each assessment to determine graduation, promotion to grade or AYP in accordance with requirements expressed in the scientific literature 20 in 21 the field of test measurement. The department of education must also be 22 held accountable by an independent panel of outside experts recognized as authorities in the field of psychometrics, pedagogy and curriculum for the quality, validity and reliability of the examinations estab-23 24 25 lished by the state board of regents.

Therefore, the legislature hereby deems it to be in the public interest to require that the state department of education provide a written report and implement an audit process to ensure validity, reliability, alignment to the state learning standards and appropriateness of use for each assessment used to determine graduation, promotion to grade or AYP.

S 2. Reporting requirements. 1. (a) Not later than September fifteenth a of each year, the commissioner of education shall submit to the state board of regents, the temporary president of the senate and the speaker of the assembly:

35 (i) A written report that conclusively demonstrates the validity, 36 reliability, alignment to the state learning standards established by 37 the department of education (learning standards) and appropriateness of 38 use for its intended purposes for each assessment (noting each instru-39 ment and the dates of usage) used by the department of education to 40 determine a student's eligibility for a high school diploma, promotion to grade, or measurement of adequate yearly progress (AYP) under the 41 federal No Child Left Behind Act of a school or district in the preced-42 Demonstration of assessment validity, 43 ing school year. reliability, 44 alignment to learning standards and appropriateness of use must be made 45 in accordance with applicable professional assessment guidelines and standards of the American Educational Research Association (AERA), the 46 47 American Psychological Association (APA) and the National Council on 48 Measurement in Education (NCME) (collectively and as may be modified from time to time, the joint standards), including pedagogic and curric-49 50 ular, as well as psychometric, standards.

(ii) A technical manual for each assessment used by the department of education and used to determine a student's eligibility for a high school diploma, promotion to grade, or measurement of AYP of a school or district in the preceding school year. The technical manual must comply with the professional requirements of the assessment industry as recognized by the AERA, APA and NCME. 1 (b) The annual report and technical manual shall be made available to 2 the public upon submission to the state board of regents and to the 3 temporary president of the senate and the speaker of the assembly.

4 2. Failure of the commissioner of education to produce a report under 5 subparagraph (i) of paragraph (a) of subdivision one of this section or 6 a technical manual under subparagraph (ii) of such paragraph for any 7 given assessment shall be deemed a failure to demonstrate the validity, 8 reliability, alignment to learning standards and appropriateness of use of such assessment, and the results from such assessment shall not be 9 10 to determine a student's eligibility for a high school diploma, used 11 promotion to grade, or measurement of AYP of a school or district in the preceding school year. The commissioner of education shall substitute an 12 alternate measure for the decision taken on the basis of the adminis-13 14 tered assessment. Where a decision to graduate or promote a student 15 cannot be based on a demonstrably valid standardized assessment, the decision will be based on a combination of final grade in the relevant 16 academic courses and faculty recommendations in place of the results of 17 18 such examination. Any part of an assessment not demonstrated to be valid 19 shall not be used for any subsequent determination.

20 Audit requirements. The state board of regents shall appoint an S 3. independent panel of experts on curricular assessments qualified to 21 22 determine whether or not an assessment meets professional standards of 23 the measurement industry and scholarly associations for validity, reli-24 ability, alignment to learning standards and appropriateness of use. The 25 panel shall be known as the regents review board, hereafter referred to 26 as the board. The board shall consist of five members. The members of 27 the board will be members of the AERA or the APA. Each member of the board will be a recognized expert in the field of testing psychometrics 28 29 curriculum evaluation and will have at least ten years experience in or 30 evaluating validity, reliability, alignment with learning standards and appropriateness of use of tests at the primary and secondary school 31 32 levels.

33 1. The board shall review each assessment used by the department of education to determine a student's eligibility for a high school diplo-34 35 ma, promotion to grade, or measurement of AYP of a school or district to determine whether the assessment meets the joint standards for assess-36 37 ment validity, reliability, alignment to learning standards and appropriateness of use. The board shall also review the commissioner of 38 education's annual report and supporting materials concerning the valid-39 40 ity, reliability, alignment to learning standards and appropriateness of use of the assessments, and the technical manual of each assessment. The 41 board shall have complete access to all documents of the department of 42 43 education relating to the assessments reviewed by the board, including 44 pilot and/or field test results for such assessments and any changes to 45 materials or practices relating to such assessments implemented as a result of such pilot and/or field tests. The board shall maintain the 46 47 confidentiality of all documents deemed to contain proprietary informa-48 tion.

2. The board shall determine whether or not each assessment used by the department of education for graduation, promotion or determination 49 50 51 of AYP is valid, reliable, aligned to the learning standards, and appropriate for use. The board shall submit, not later than October fifteenth 52 53 each year, a written report of its findings to the state board of of 54 regents, the temporary president of the senate and the speaker of the 55 assembly. The report shall be made available to the public upon its submission as provided in this subdivision. 56

3. If the board determines that any part of an assessment used by the 1 2 department of education does not meet the standards for validity, reli-3 ability, alignment to learning standards or appropriateness of use under 4 the joint standards, such part or parts of those assessments shall be 5 considered invalid, and the results from such assessment shall not be 6 used to determine a student's eligibility for a high school diploma, 7 promotion to grade, or measurement of AYP of a school or district in any 8 school year. The commissioner of education shall substitute an alternate 9 measure for the decision taken on the basis of the administered assess-10 ment. Where a decision to graduate or promote a student is based on an 11 assessment not demonstrably valid, the decision will be based on a combination of final grade in the relevant academic courses and faculty 12 13 recommendations in place of the results of such examination. The deter-14 mination of the board shall be final as to the use of those assessments. 15 4. If any part of an assessment used by the department of education has been determined by the board to fail to meet the joint standards and 16 17 related research for assessment validity, reliability, alignment to 18 learning standards or appropriateness of use, the commissioner of educa-19 tion shall not use such part or parts of the assessment in any subse-20 quent test administrations.

21 4. Pilot testing. 1. No later than sixty days prior to the depart-S 22 ment of education's scheduled administration of any assessment to deter-23 mine a student's eligibility for a high school diploma, promotion to 24 grade, or measurement of AYP of a school or district in the preceding 25 school year, the commissioner of education shall submit to the board, 26 the state board of regents and the temporary president of the senate and speaker of the assembly the results of all pilot and/or field tests 27 the 28 conducted for that assessment and make available to the board all 29 records relating to such pilot and/or field tests and results. Pilot 30 and/or field tests are assessments administered by the department of education that are not being used for decisions of graduation, promotion 31 32 grade, or measurement of AYP but contain individual questions that to 33 are to be used on assessments to determine a student's eligibility for a high school diploma, promotion to grade, or measurement of AYP. For purposes of this section, results of pilot and/or field tests shall 34 35 36 include, but not be limited to, analysis of answers to questions on the 37 administered pilot and/or field test based on percentage answered 38 correctly, breakdown of results according to race and gender, an expla-39 nation of how the pilot and/or field test was administered, and an 40 explanation of the learning standard a question purports to test. The failure to submit and identify pilot and/or field test results or to 41 provide access to records as required under this subdivision shall 42 43 preclude the department of education from using or administering the 44 assessment.

45 2. Where the board has received from the commissioner of education the results of the pilot and/or field test for an assessment as required 46 47 under subdivision one of this section, the board shall, not later than 48 thirty days prior to the department of education's scheduled adminissuch assessment, deliver to the state board of regents and 49 tration of 50 the temporary president of the senate and the speaker of the assembly a 51 written report evaluating the pilot and/or field tests and the results 52 of the pilot and/or field tests provided by the department of education. The written report of the board shall be made available to the public. 53 54 3. In its evaluation, the board will identify any recognizable short-

55 comings of the pilot and/or field tests. If the board determines that 56 any part of the pilot and/or field tests were not conducted in accord-

ance with the joint standards, that they fall short of needed prepara-1 2 tion, or if it appears to the board that the assessment for which the 3 pilot and/or field tests were conducted is likely to fail to meet the 4 criteria for validity, reliability, alignment to learning standards, or 5 appropriateness of use under the joint standards, the board shall recom-6 mend to the state board of regents that the department of education 7 shall not use or administer the assessment for which the pilot and/or 8 field tests were conducted. The state board of regents shall, within fourteen days of receipt of the board's report, provide to the board, 9 10 the temporary president of the senate and the speaker of the assembly written notice of the actions proposed to be taken by the state board of 11 regents with respect to the recommendations of the board contained in 12 13 such report.

14 S 5. This act shall take effect on the ninetieth day after it shall 15 have become a law; provided, however, that effective immediately, the 16 addition, amendment and/or repeal of any rule or regulation necessary 17 for the implementation of this act on its effective date are authorized 18 and directed to be made and completed on or before such effective date.
