I N A S S E M B L Y

(PREFILED)

January 7, 2009

Introduced by M. of A. GOTTFRIED -- read once and referred to the
Committee on Health

AN ACT to amend the public health law, in relation to creating a certificate of need application public tracking system

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative intent. Health care providers are continuously
2 evaluating the needs of their communities and adapting their services to
3 better respond to those needs and patient preferences, and to provide
4 the highest quality care in the most appropriate setting.
5 Part of the challenge is being able to plan effectively for service
6 expansions, contractions, or new partnerships in a timely manner so that
7 patients experience a seamless and well-coordinated system of care. New
8 York's certificate of need (CON) system, designed to ensure the best
9 possible allocation of health care services and resources, is an important
10 step in this process, but can also pose an obstacle due to long
11 processing times and/or communication challenges.
12 New York's health care system could benefit from a more transparent
13 CON process so that providers, consumers, and regulators have real-time
14 data on the progress of health care reform, and to ensure that the
15 system responds effectively to community health needs.
16 S 2. Section 2802 of the public health law is amended by adding a new
17 subdivision 8 to read as follows:
