h. (1) The commissioner shall by regulation provide the standard of service with which such a public library system must comply. Such regulations shall, among other things, relate to the total book stock; the diversity of such book stock with respect to general subjects and type of literature, provided that such regulations shall not, directly or indirectly, prohibit the inclusion of a particular book, periodical or material or the works of a particular author or the expression of a particular point of view; annual additions to book stock; circulation of book stock; maintenance of catalogues; number and location of libraries or branch libraries; hours of operation and number and qualifications of personnel, necessary to enable a public library system to render adequate service. Such regulations may establish standards which differ on the basis of population; density of population; the actual valuation of the taxable property within the area served; the condition of library facilities in existence on April first, nineteen hundred fifty-seven; the amount raised by taxation by or for the area served; the relation of such amount to population and actual value of the property taxed; the relation of the amount of funds received by a public library system from local taxes to that derived from private contributions; or on such other basis as the commissioner finds necessary to provide for the equitable distribution of state aid.
