IMPACT ON MEMBER CONTRIBUTIONS - NON-TDA PROVISIONS: Currently, Basic Member Contributions ("BMC") of 3.0% of salary for Tier IV members are required (per Chapter 126 of the Laws of 2000) for only the first 10 years of membership or the first 10 years of credited service, whichever occurs earliest.

Under the proposed legislation, certain New Members would be required to pay BMC for all years of credited service up to a maximum of 27 years.

Currently, under the existing Age 55 Program, only those participants subject to the 27-year provisions are required to contribute AMC of 1.85% of salary to a maximum of 27 years of credited service.

Under Part C of the proposed legislation, New Member 27-year participants in the Age 55 Program after the Effective Date would be required to contribute AMC for all years of credited service.

FINANCIAL IMPACT - OVERVIEW: If enacted into law, the ultimate employer cost of this proposed legislation would be determined by the net change in benefits paid, offset by any increases in member contributions, and by the reduced amount of interest credited to TDA Fixed Fund account balances.

FINANCIAL IMPACT - NON-TDA PROVISIONS - ACTUARIAL PRESENT VALUES - CURRENT MEMBERS: Based on the census data and the actuarial assumptions and methods currently in effect, the enactment of this proposed legislation would not change the APV of benefits, the APV of member contributions or the APV of future salary of current members of NYCTRS or BERS as of June 30, 2008.

IMPACT ON NYCRS RETIREMENT PLANS - TDA PROVISIONS: The proposed legislation changes to the TDA provisions would cover both existing members and New Members of NYCTRS and BERS in Tier I, Tier II, Tier III and Tier IV whose job titles are represented in collective bargaining by the United Federation of Teachers ("UFT") ("Covered Members").

These TDA changes would impact all such NYCTRS and BERS members regardless of the Plan in which they participate.

BACKGROUND - EARNINGS ON TDA ACCOUNTS - CURRENT LAW: Under current law, eligible members of NYCTRS who elect to participate in the TDA Program select from among the following funds to allocate their TDA account balances (100.0% in one Fund or proportions (delineated in minimum 5.0% increments)) within the following six alternative funds:

- * A Fixed Fund that provides a guaranteed annual rate of return of 8.25% per annum (for periods on and after July 1, 1988), or

- * Five separate Variable Funds (i.e., Diversified Equity Fund, Stable Value Fund, International Equity Fund, Inflation Protection Fund or Socially Responsive Equity Fund) that provide alternative risk/reward characteristics.

Eligible BERS members who participate in the TDA Program select only from the Fixed Fund and the Diversified Equity Fund.

At retirement after age 59 1/2, TDA participants may receive their TDA account balances payable as a lump sum, as a monthly annuity based on annuitization factors used by the NYCTRS or BERS Qualified Pension Plan ("QPP") Programs, respectively, or in other amounts they elect subject to the Internal Revenue Code ("IRC") Minimum Required Distribution ("MRD") rules for those age 70 1/2 or greater.

BACKGROUND - EARNINGS ON TDA ACCOUNTS - PROPOSED LAW: Under the proposed legislation, the interest crediting rate for TDA participants in the Fixed Fund for Covered Members would be decreased (i.e., 8.25% per annum would decrease to 7.0% per annum).

FINANCIAL IMPACT - TDA FIXED FUND ASSETS - OVERVIEW: If enacted into law, the ultimate change in employer cost of this proposed legislation would equal the change in benefits payable by NYCTRS and BERS arising from revised TDA provisions.

Simplistically, this change in employer cost would equal the cumulative reduction in obligations between crediting 8.25% per annum and 7.0% per annum on TDA Fixed Fund account balances for Covered Members.

However, financing this change in obligations is not simplistic.

Under current law, TDA Fixed Fund assets of NYCTRS and BERS are co-invested with NYCTRS QPP assets.

The Investment Policy for NYCTRS QPP assets reflects a broad asset allocation of 70% equity-like securities and 30% bond-like securities.

The actuarial assumptions currently in effect include an Actuarial Interest Rate ("AIR") assumption of 8.0% per annum that is consistent with an assumption that the NYCTRS QPP assets are expected to earn an average of 8.0% per year. To the extent that TDA Fixed Fund assets earn more than 8.25% per year (i.e., the crediting rate on TDA Fixed Fund account balances), actuarial gains occur. To the extent that TDA Fixed Fund assets earn less than 8.25% per year, actuarial losses occur.

To the extent TDA Fixed Fund account balances are shifted to Variable Funds or vice versa, there are also impacts on the potential cost of the TDA Programs.

Under the proposed legislation, access to and earnings payable on the Variable Funds would not change.

Under current actuarial practice, the Actuary spreads through the Actuarial Asset Valuation Method ("AAVM") over six years and then over

the expected future working lifetimes of NYCTRS QPP and BERS QPP active members the investment gains/losses attributable to the TDA Fixed Fund earnings equaling more/less than the 8.25% per annum TDA Fixed Fund Interest Crediting Rate.

In particular, the Actuary includes in the NYCTRS QPP and BERS QPP actuarial valuations a modest load to the Actuarial Present Value of Benefits ("APVB") equal to approximately 2.3% of their respective TDA Fixed Fund assets. This amount is intended to represent a portion of the anticipated difference between the expected earnings on TDA Fixed Fund assets and the TDA Fixed Fund Interest Crediting Rate. These obligations are financed over the expected future working lifetimes of NYCTRS QPP and BERS QPP active members.

FINANCIAL IMPACT - TDA FIXED FUND ASSETS - RISK ADJUSTED: As noted earlier, the expected long-term actuarial loss on TDA Fixed Fund assets, under the current actuarial assumptions, is .25% of TDA Fixed Fund assets, per year.

However, on a risk-adjusted basis, the economic implications are more significant. Specifically, TDA Fixed Fund account balances are credited with interest at a rate of 8.25% per annum, not subject to any risk to the TDA participants.

To earn the AIR assumption of 8.0% per annum, (or the 8.25% per annum crediting rate), TDA Fixed Fund assets are subject to considerable investment risk.

Were NYCTRS to set aside TDA Fixed Fund assets whose characteristics had a comparable level of certainty of payment, it would have to invest in some form of risk-free asset class such as U.S. Treasury securities.

Although a TDA participant may move, following a modest notification period, his or her TDA account balance between the Fixed Fund and the Variable Funds, the Actuary has assumed an average TDA Fixed Fund holding period of 10 years. Comparing the expected yield on 10-year U.S. Treasury securities would then be a reasonable, risk-adjusted benchmark.

Over time, intermediate-term U.S. Treasury securities may be expected to earn a real rate of return of approximately 2.5% per year. Combined with a long-term assumption for inflation of 2.5% per year, a total rate of return for intermediate-term Treasury securities would equal approximately 5.0% per year.

Comparing the current risk-free TDA Fixed Fund interest crediting rate of 8.25% per annum with a long-term expected, market place, risk-free yield of 5.0% per year on intermediate-term U.S. Treasury securities indicates that TDA account balances are being credited with an expected 3.25% per year greater rate of return on a risk-adjusted basis than the expected earnings on the supporting TDA Fixed Fund assets.

Thus, on an economically robust, risk-adjusted basis, the crediting of TDA account balances with interest at either 7.0% or 8.25% per annum is more expensive than reported on a non-risk-adjusted basis.

FINANCIAL IMPACT - TDA VARIABLE ANNUITY CONVERSIONS: In addition, the Actuary holds as obligations of the NYCTRS QPP and BERS QPP, amounts to reflect the actuarial losses anticipated upon the conversion of some TDA account balances into Variable Annuities. This reflects the fact that the annuity factors used for such conversion, by law, are not actuarially equivalent to what the Actuary assumes in the actuarial valuations.

Under the proposed legislation, TDA participants would be permitted to transfer their TDA Fixed Fund account balances to one or more of the Variable Funds as soon as feasible under the direction of the Plan administrators of each NYCTRS and BERS.

However, it is not expected that enactment of the proposed legislation would result in substantial numbers of TDA participants transferring their TDA Fixed Fund account balances to TDA Variable Funds.

FINANCIAL IMPACT - TDA FIXED FUND - SUMMARY: Annual investment returns on the TDA Fixed Fund assets that exceed the guaranteed amounts to be credited to the TDA Fixed Fund accounts produce actuarial gains.

Conversely, annual investment returns less than the guaranteed amounts to be credited to the TDA Fixed Fund accounts produce actuarial losses.

Under the current AIR assumption of 8.0% per annum, an aggregate long-term net actuarial loss of .25% on TDA Fixed Fund account balances is expected. This loss ultimately increases employer costs.

The Actuary anticipates that enactment of the proposed legislation with respect to the decrease to 7.0% per annum from 8.25% per annum of the Interest Crediting Rate on TDA Fixed Fund account balances in NYCTRS and BERS would become effective in the Fiscal Year containing the Effective Date.

If enacted before June 30, 2010, the Actuary would likely reduce Fiscal Year 2010 employer contributions to reflect that there would be fewer TDA Fixed Fund account balances expected to be credited at 8.25% per annum.

As of June 30, 2008, TDA Fixed Fund account balances equaled approximately \$8.970 billion for NYCTRS and \$456.8 million for BERS.

Assuming a portion of the TDA Fixed Fund account balances would be transferred to the TDA Variable Funds following enactment of this proposed legislation, the Actuary would likely apply the 2.3% load to only non-UFT TDA account balances.

If the proposed legislation were enacted on or before June 30, 2010, the impact of reducing expected TDA Fixed Fund actuarial losses would result in decreases in Fiscal Year 2010 employer contributions of approximately \$18.7 million for NYCTRS and \$.4 million for BERS.

It is anticipated that the annualized expected reduction in Fiscal Year 2010 employer contributions to NYCTRS and BERS would continue for future years.

PROJECTED CHANGES IN EMPLOYER CONTRIBUTIONS - CURRENT ACTUARIAL ASSUMPTIONS AND METHODS: If the proposed legislation were enacted and effective for certain New Members on or after the Effective Date, these New Members would first join the NYCTRS during Fiscal Year 2010 and first be included in the June 30, 2010 actuarial valuations of the NYCTRS used to determine Fiscal Year 2012 employer contributions.

However, since most New Members of NYCTRS and BERS impacted by this proposed legislation would likely not be hired until September 2010 and would first be included in the June 30, 2011 actuarial valuations of the NYCTRS, the first significant impact of the proposed legislation with respect to non-TDA provisions would likely be on the Fiscal Year 2013 employer contributions.

The proposed changes to the TDA provisions would first impact the Fiscal Year 2010 employer contributions.

The following Table 1 presents an estimate of the reduction in employer contributions that would occur based on current actuarial assumptions and methods:

* Based on projection assumptions set forth in Actuarial Assumptions and Methods Section and as noted herein. Includes both impact of non-TDA provisions with first significant impact in Fiscal Year 2013 and TDA provisions with impact in Fiscal Year 2010 and later.

The estimated reductions in employer contributions shown in Table 1 are based upon the following projection assumptions:

* Level workforce (i.e., new employees are hired to replace those who leave active status).

* Projected salary increase consistent with those used in projections presented to the New York City Office of Management and Budget ("NYCOMB") on February 20, 2009 ("February Projections").

* New entrant salaries consistent with those used in the February Projections.

These "open group" projections include future new entrants introduced into the census data models to project the future workforces.

As of each future actuarial valuation date, the current "closed group" actuarial assumptions and valuation methodology are used.

Under this methodology only Plan Participants as of each actuarial valuation date are utilized to determine Actuarial Present Values, employer costs and employer contributions.

To the extent Plan designs do not change markedly over time, such closed group actuarial methodology is well suited to funding a Retirement System.

FINANCIAL IMPACT - ACTUARIAL PRESENT VALUES - POTENTIAL METHODOLOGY: The impact of enactment of the proposed legislation provided in this Fiscal Note has been based on the continued use of the current actuarial assumptions and methods.

However, the current actuarial assumptions and methods do not represent the only possible approach for funding the NYCERS.

Historically, actuarial assumptions and methods have been reviewed on average every five years in connection with an actuarial experience study mandated by New York City Charter Section 96.

Following this review, the Actuary generally proposes changes in actuarial assumptions and methods that he believes appropriate and reasonably related to such experience period and future expectations.

The next such review is anticipated during Fiscal Year 2011 or 2012.

If enacted, the proposed legislation would increase the duration of member contributions of New Members of the NYCTRS and BERS. This increase may possibly impact the timing of their election to retire for service and hence, their future working lifetimes. As such, the Actuary

will be considering alternative actuarial methodologies that could, directly or indirectly, reflect the impact of future new entrants as early as the Fiscal Year of enactment.

The Actuary may also consider revising the amortization periods for financing certain costs in order to reflect the expected change in the average working lifetimes of New Members hired after enactment of this proposed legislation.

Note: The Actuary has not committed to any particular methodology for determining employer costs and employer contributions in connection with the upcoming, experience review of actuarial assumptions and methods. However, the Actuary intends to consider seriously the potential implications for financing the NYCERS that could arise should the benefits and the expected future working lifetimes of certain New Members after the Effective Date differ from those of current new entrants.

FINANCIAL IMPACT - ENTRY AGE NORMAL COSTS: Entry Age Normal Costs can provide a useful basis to compare the value of alternative benefit programs. For each member who enters a NYCERS, there is a theoretical net annual employer cost to be paid for such member while such member remains actively employed (i.e., the Entry Age Normal Cost ("EANC")).

In addition, such EANC may be expressed as a percentage of salary earned over a working lifetime and referred to as the Entry Age Normal Rate ("EANR").

Under the proposed legislation and based on the actuarial assumptions noted herein, the EANC and EANR of New Members would be less than the EANC and EANR for comparable new members entering at the same attained age and gender under the current NYCERS provisions.

A summary of the change in EANC by NYCERS for entry age 25, 30 and 35 follows:

** EANR were determined as of June 30, 2008 and do not vary significantly over time, absent benefit and/or actuarial assumption changes.

FINANCIAL IMPACT - EMPLOYER CONTRIBUTIONS FISCAL YEARS 2010, 2011 and 2012 - CURRENT METHODOLOGY: Based on the census data and the actuarial assumptions and methods currently in effect, and assuming enactment to be effective on or before June 30, 2010, the enactment of this proposed legislation would, with respect to the changes in TDA provisions, result in changes in employer contributions to NYCTRS and BERS for Fiscal Years 2010, 2011 and 2012.

FINANCIAL IMPACT - EMPLOYER CONTRIBUTIONS FISCAL YEAR 2013 AND BEYOND - CURRENT METHODOLOGY: If enacted to be effective on or before June 30, 2010, the first significant number of New Members would join NYCTRS and BERS during September 2010 and be included in the June 30, 2011 (Lag) actuarial valuations of those NYCTRS. Based on the actuarial assumptions and methods currently in effect, those provisions under the proposed legislation that affect New Members would first significantly impact employer contributions to NYCTRS and BERS for Fiscal Year 2013.

OTHER COSTS: Not measured in this Fiscal Note is the impact of this proposed legislation on Other Post-Employment Benefit ("OPEB") costs. Also not measured are the initial and ongoing additional administrative costs of NYCTRS and BERS and their participating employers to implement the proposed legislation.

CENSUS DATA: The starting census data used for the calculations presented herein are the census data used in the June 30, 2008 (Lag) actuarial valuations of NYCTRS and BERS.

The census data used for the estimates of additional APVB and employer contributions presented herein of the non-TDA portions of the proposed legislation are based on average salaries of new entrants in the June 30, 2008 (Lag) actuarial valuations of NYCTRS and BERS.

The metrics for new members of NYCTRS were approximately 25% male, age 34 and 75% female, age 34 and a combined average salary of \$48,239.

The metrics for new members of BERS were approximately 25% male, age 41 and 75% female, age 44 and a combined average salary of \$33,774.

The census data used for estimates of the impact on employer contributions of the TDA portion of the proposed legislation presented herein are those active participants included in the June 30, 2008 (Lag) actuarial valuations of the NYCTRS and BERS.

For NYCTRS, this consisted of 2,401 Tier I, 1,224 Tier II and 69,273 Tier IV TDA participants included in the June 30, 2008 (Lag) actuarial valuation of NYCTRS.

For BERS, this consisted of 108 Tier I, 58 Tier II and 11,799 Tier IV TDA participants included in the June 30, 2008 (Lag) actuarial valuation of BERS.

ACTUARIAL ASSUMPTIONS AND METHODS: The additional APVB, EANR and employer contributions under current methodology presented herein have been calculated based on the actuarial assumptions and methods in effect for the June 30, 2008 (Lag) actuarial valuations of NYCTRS and BERS.

Employer contributions under current methodology have been estimated assuming the additional APVB would be financed through future normal contributions.

Projections of salaries, reflecting the impact of estimated contractual wage increases, include information provided by NYCOMB. These and other projection assumptions (such as projected expenses) are set forth in the February Projections.

New entrants were projected to replace the NYCERS members expected to leave the active population to maintain a steady-state population.

The following Table 3 presents the total number of active employees used in the projections, assuming a level work force, and the net number of New Members as of each June 30 from 2009 to 2017.

2017	112,472	36,461	22,702	9,595

* Active members included in the projections assume a level work force based on the June 30, 2008 (Lag) actuarial valuation census data. For simplification, all New Members in TRS and 15% of the New Members in BERS are assumed to be UFT Members.

The changes in employer contributions and costs have been estimated assuming that changes in the Actuarial Present Values of Future Employer Costs would be financed through future normal contributions.

Information on TDA Fixed Fund and TDA Variable Fund account balances used to estimate the impact on employer costs of the TDA portion of the legislation presented herein also reflect financial information provided by the accountants of NYCTRS and BERS.

STATEMENT OF ACTUARIAL OPINION: I, Robert C. North, Jr., am the Chief Actuary for the New York City Retirement Systems. I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

FISCAL NOTE IDENTIFICATION: This estimate is intended for use only during the 2009 Legislative Session. It is Fiscal Note 2009-17, dated November 17, 2009, prepared by the Chief Actuary of the New York City Teachers' Retirement System and the New York City Board of Education Retirement System.

FISCAL NOTE.--This bill would (1) create new benefits for new members who first join the New York State and Local Employees' Retirement System, the New York State Teachers' Retirement System, the New York City Teachers' Retirement System, the New York City Employees' Retirement System or the New York City Board of Education Retirement System on or after January 1, 2010 (2) create a new plan in the New York State and Local Police and Fire Retirement System.

Insofar as this bill would affect the New York State and Local Employees' Retirement System (ERS), the significant plan design changes for members who join on or after January 1, 2010 include:

1. Employee contributions of 3% of pay for all years of service, except

- State correction officer contributions would be limited to 30 years of service, &
- uniformed court officers/peace officers employed by the Unified Court System would contribute 4% of pay for all years of service.

2. Ten year vesting,

3. Larger early retirement reductions would be in place for members retiring prior to age 62, and the waiver of reduction with 30 years would be eliminated except for uniformed court officers/peace officers employed by the Unified Court System,

4. Annual overtime pay in excess of \$15,000 would not be included in the definition of wages and final average salary. This overtime pay limitation would increase by 3% annually.

If this bill is enacted, we will calculate new plan rates for all ERS members who first enter on or after January 1, 2010. The long term expected annual employer contribution rate for new general members will be approximately 8.9% as compared to the current expected long term annual employer contribution rate for Tier 4 general members of approximately 11.0% of payroll. For fiscal year ending March 31, 2010, since the average Tier 4 employer contribution rate is approximately 7%, the new plan rate would be approximately 5.7%.

For ERS members in 20 or 25 year retirement plans that allow retirement without regard to age, the long term reductions would vary by plan and be less than 2% of salary, with the fiscal year ending March 31, 2010 reductions averaging approximately 1%.

Insofar as this bill would affect the New York State and Local Police and Fire Retirement System (PFRS), the significant plan design changes for members who join on or after January 1, 2010 include:

1. An employee contribution of 3% of pay will be required for all years of service, except that a member who is enrolled in a plan that limits the amount of creditable service which may be accrued will not be required to contribute after accruing the maximum amount of creditable service under such plan,

2. Overtime pay in an amount in excess of 15% of a member's annual wages not classified as overtime pay shall be excluded from a member's final average salary,

3. Ten year vesting.

If this bill is enacted, we will calculate new plan rates for all PFRS members who first enter on or after January 1, 2010. The long term expected annual employer contribution rate would change as follows:

- 1.8% for municipal 20 year plans with additional 60ths (benefits for members hired on or after 7/1/2009 are now computed under Article 14),

- 0.6% for the state 20 year plan with additional 60ths (benefits for members hired on or after 7/1/2009 are now computed under Article 14),

- 2.6% for 20 year plans (benefits for members hired on or after 7/1/2009 are now computed under Article 14),

- 3.0% for 25 year plans with additional 60ths, 25 year plans, and regular plans previously non-contributory.

This estimate, dated November 16, 2009, and intended for use only during the 2009 Legislative Session, is Fiscal Note No. 2009-297, prepared by the Actuary for the ERS and PFRS.

FISCAL NOTE.--This bill would amend various sections of the Education Law and the Retirement and Social Security Law to implement a new retirement benefit structure (Tier 5) for members who first join a public retirement system of the state (or New York City) on or after January 1, 2010. The following provisions are with respect to members of the New York State Teachers' Retirement System. Members would be eligi-

ble for a service retirement benefit after rendering a minimum of ten years of credited service and attainment of age 55. The service retirement benefit formula for a member with less than twenty-five years of service would be equal to one-sixtieth of final average salary times the years of service. The service retirement benefit formula for a member with twenty-five or more years of service would be equal to one-fiftieth of final average salary times the years of service (not in excess of thirty). Years of service in excess of thirty shall provide an additional retirement benefit equal to three two-hundredths of final average salary. Members retiring prior to age 62 would have their retirement benefit reduced by one-fifteenth per year for each of the first two years retirement predates age 62 and by one-twentieth per year for each year retirement predates age 60. However, members who are at least age 57 with 30 or more years of credited service would be permitted to retire without reduction. Members would be required to contribute three and one-half percent of annual salary for ALL years of service.

The current required employer contribution rate for the New York State Teachers' Retirement System is 6.19% of pay, applicable to 7/1/09 - 6/30/10 member salaries and to be collected in the fall of 2010. This rate is applicable to the salaries of all members, regardless of tier. In that this proposed benefit structure is only applicable to members joining on or after January 1, 2010, it will be at least several years before it has a noticeable impact on the employer contribution rate. The cost savings impact of this change will become more significant with time as the number of post-1/1/10 members grows as a percentage of the total membership.

Our "new entrant rate", a hypothetical employer contribution rate that would occur if we started a new Retirement System without any assets, is equal to 11.8% of pay under the current benefit structure. This can be thought of as the cost of the benefit structure for new entrants, based on current actuarial assumptions. Under the proposed benefit structure, this new entrant rate would be equal to 8.7% of pay.

The source of this estimate is Fiscal Note 2009-92 dated November 16, 2009 prepared by the Actuary of the New York State Teachers' Retirement System and is intended for use only during the 2009 Legislative Session.
