Introduced by Sen. AUBERTINE -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to outdoor wood boilers

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative intent. The legislature finds that wood is a sustainable and renewable resource and that burning clean wood for heat reduces our dependence on more costly foreign non-renewable sources of energy. The legislature further finds that responsible burning of clean wood in an outdoor wood boiler provides a reliable source of heat and hot water at a relatively low cost when compared to other energy sources. Furthermore, the legislature finds that because of the wide variation in climate, topography, community character and socio-economic conditions throughout New York state, any regulation of outdoor wood boilers that is more restrictive than that contained in this act is most appropriately left to local governments.

S 2. Article 19 of the environmental conservation law is amended by adding a new title 13 to read as follows:

TITLE 13
