The annual cost to the employers of members of the New York State Teachers' Retirement System is estimated to be negligible if this bill is enacted.

The source of this estimate is Fiscal Note 2012-14 dated February 22, 2012 prepared by the Actuary of the New York State Teachers' Retirement System and is intended for use only during the 2012 Legislative Session. FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would amend Section 212 of the Retirement and Social Security Law to set the amount a retired person may earn in public employment without reduction in retirement allowance during the year 2013 and thereafter, to \$32,500.

If this bill is enacted, insofar as it would affect the New York State and Local Employees' Retirement System, we expect that a number of members will retire earlier than they otherwise would have due to the expectation of collecting both a pension and the salary they were receiving before they retired. A significant number of members changing their retirement dates will result in a shorter funding period and greater annual employer contributions. The extent of the increase in employer contributions will be determined by the number of members retiring early to collect both salary and pension.

Insofar as this bill would affect the New York State and Local Police and Fire Retirement System, there would be negligible additional annual costs.
