AN ACT to amend the education law, in relation to requiring the collection, maintenance and evaluation of high school graduation rates and the reporting of such rates

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative intent and purpose. The legislature hereby finds and declares it necessary for the state to require the creation and maintenance of a data and public reporting system which collects and gathers data which accurately reflects and accounts for statewide high school graduation rates and which makes such data available to the public. It is necessary for the success of this state's economy that public high schools properly and efficiently provide all students with proper preparation for college. It is critical for the state to assess this preparation and, in doing so, must examine and evaluate graduation rates within the public school system.

An accurate evaluation of such information requires the collection of comprehensive data pertaining to statewide graduation rates including information which specifically reflects unique student identifiers such as race, ethnicity, disability, proficiency with the English language and socio-economic levels. This information may best be obtained by the state tracking students from kindergarten through postsecondary education.

Since parents and community members play such a critical role in ensuring strong educational accountability, the state must be required

to make available to the public all such data and information reflecting the state's progress towards increasing graduation rates and such reports must be made readily accessible to the entire public.
