on Economic Development

AN ACT to amend the executive law, in relation to providing for the  
regulation of the sale, use and storage of nitric acid; and to amend  
the penal law, in relation to disseminating material on the manufac-  
ture of an explosive

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEM-  
BLY, DO ENACT AS FOLLOWS:

1     Section 1. Legislative intent. The legislature hereby finds that while  
2     there are important uses for substances like nitric acid, it is impor-  
3     tant that we safeguard these substances in order to prevent them from  
4     being used to harm both people and property. Nitric acid can be used to  
5     cause harmful explosions and its use carries the ability, if fallen in  
6     the wrong hands, of resulting in massive destruction.  
7     Currently, the sale of nitric acid is not regulated on an appropriate  
8     level. Retailers are not required to check the identification of the  
9     buyers when selling them nitric acid. They are also not required to  
10    maintain records of the sale. This act would require that retailers  
11    check the identification of buyers purchasing nitric acid and record  
12    their name and address.  
13    In addition, there are no standard rules or requirements maintaining  
14    the security of nitric acid in academia. While this act does not hinder  
15    the important academic work that surrounds the use of nitric acid in  
16    colleges, universities and even high schools, it would provide a set  
17    standard ensuring we do our part in not allowing our academic insti-  
18    tutions to become tools for potential terrorists.  
19    Finally, while the advent of the internet has provided us countless  
20    benefits, it has also increased the threat we face from people looking  
21    to harm Americans, using information widely available on the web. This  
22    act bans websites that provide guides on taking nitric acid and turning  
23    it into explosives.

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets  
[ ] is old law to be omitted.
