- (a) a federal multi-agency report issued in 2009, entitled "The State of the Birds, United States of America", provides the most comprehensive assessment to date on the status of bird populations;
- (b) the multi-agency report concludes that nearly one-third of this nation's 800 bird species are endangered, threatened or in significant decline;
- (c) daytime and nighttime collisions with man-made structures are the most significant, quantifiable causes of avian mortality and are increasing with adverse effects being seen at a population level with estimates ranging from several hundred million to one billion birds dying from collisions annually in the United States:
- (d) not only are birds beautiful, interesting and fascinating creatures that are eagerly welcomed by millions of Americans into their backyards every year, but birds also have an impact on the United States and the New York state economies;
- 19 (e) the United States Fish and Wildlife Service has reported that 20 birdwatchers contribute thirty-six million dollars annually to the econ-21 omy, and birds naturally provide billions of dollars worth of pest 22 control, benefitting farmers, forestry owners and consumers alike;
