IN SENATE -- Introduced by Sens. LAVALLE, ZELDIN -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation

IN ASSEMBLY -- Introduced by M. of A. SWEENEY, THIELE, ENGLEBRIGHT, FITZPATRICK, LOSQUADRO, MURRAY, RAIA -- read once and referred to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to the addition of certain lands within the Carmans River watershed to the core preservation area of the Central Pine Barrens

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative findings. The Legislature finds that increasing
2 protection for the Carmans River and its watershed as a part of the
3 Central Pine Barrens is a vital goal that benefits the environment and
4 the economy of the state. The Carmans River is one of only two found
5 within the Central Pine Barrens. As such, the Carmans River represents a
6 significant and integral part of the Central Pine Barrens ecosystem.
7 Although various State and local measures have been undertaken to
8 protect the Carmans River over the last several decades, recent scien-
9 tific studies have indicated that existing measures are insufficient to
10 protect the Carmans River. Further, the Carmans River is beginning to
11 demonstrate a decline in both the quality of its surface water and its
12 ecological integrity.
13 The town of Brookhaven has commenced a planning process to protect the
14 Carmans River. The proposed plan is designed to protect and preserve the
15 areas within the Carmans River watershed while also allowing for appro-
16 priate economic growth in areas of Brookhaven outside of the Carmans
17 River watershed through the implementation of a transfer of development
18 rights program and the creation of a multi-family district to receive
19 those development rights. This process has also involved the cooper-

1 ation and participation of the Central Pine Barrens joint planning and
2 policy commission.

3 The entire watercourse of the Carmans River lies within the Central
4 Pine Barrens and much of its groundwater watershed also lies within the
5 Central Pine Barrens and entirely within the town of Brookhaven.
6 Accordingly, the most effective means of achieving the objectives of
7 environmental preservation of the Carmans River watershed and economic
8 growth on other areas of the town of Brookhaven would be to expand the
9 core preservation area of the Central Pine Barrens.

10 As a result, it is proposed to expand the core preservation area boun-
11 dary to encompass those areas most critical to the Carmans River and to
12 include public parklands and open space areas which are near or current-
13 ly adjacent to the core preservation area and which should be integrated
14 into the core preservation area. The Central Pine Barrens Area boundary
15 located south of the Long Island Expressway will also be expanded to be
16 coincident with boundaries of the expanded core preservation area.

17 The expansion of the core preservation area will provide significantly
18 more protection to the Carmans River than currently exists and will help
19 to ensure that key ecological values and habitats will be adequately
20 protected, enhanced and maintained.

21 This legislation establishes a process consistent with the ongoing
22 town of Brookhaven planning process that will result in the inclusion of
23 the Carmans River watershed in the core preservation area and the imple-
24 mentation of an amendment to the Central Pine Barrens Comprehensive
25 Management Plan to protect the Carmans River watershed.

26 S 2. Section 57-0107 of the environmental conservation law is amended
27 by adding four new subdivisions 10-a, 11-a, 11-b and 15 to read as

S 4. Agriculture and horticulture study and analysis in the Central Pine Barrens. 1. Agriculture and horticulture continues to be a major, important and vital industry in the Central Pine Barrens and it continues to be the policy of the state of New York that compatible agricultural and horticultural uses be maintained and encouraged within the Central Pine Barrens. Sustaining agriculture in the Central Pine Barrens while harmonizing and balancing such use with other, concomitant Central Pine Barrens objectives, including groundwater and ecological protection, continues to be a primary goal of the state of New York.

2. As soon as is practicable and within twelve months of the effective date of this section, the Central Pine Barrens Joint Planning and Policy commission shall prepare or cause to be prepared, in cooperation and

1 coordination with the Suffolk county planning department and the Suffolk
2 county agricultural and farmland protection board, a comprehensive study
3 and analysis of agriculture and horticulture in the Central Pine
4 Barrens.

5 3. The study shall examine and shall incorporate the following
6 elements:

7 (a) An identification and inventory of existing farms, farmland, agri-
8 cultural land and horticultural land within both the compatible growth
9 area and the core preservation area. The inventory shall include, but
10 not be limited to:

- 11 (i) locations of existing farms;
- 12 (ii) boundaries of existing farms, including tax map parcels;
- 13 (iii) ownership;
- 14 (iv) leased farmland;
- 15 (v) areas of farms in active cultivation;
- 16 (vi) areas of farms which have been cleared of natural vegetation;
- 17 (vii) areas of fallow farmland;
- 18 (viii) areas of farms remaining in natural vegetation;
- 19 (ix) areas of farms devoted to other uses including, but not limited
20 to, infrastructure, windbreaks, structures, equipment storage, irri-
21 gation wells and pumps;
- 22 (x) agricultural products generated by each farm;
- 23 (xi) ecological, hydrological, geological, historical, scenic and
24 archaeological features within or in proximity to existing farms;
- 25 (xii) location of agricultural districts in relation to existing
26 farms; and
- 27 (xiii) any other elements considered necessary.

28 (b) An identification and inventory of the existing land uses which
29 lie adjacent to and/or occupy the areas surrounding each farm.

30 (c) An identification and analysis of areas adjacent to existing farms
31 which may be considered for farm expansion in future years, the extent
32 of active cultivation on existing farms and the presence of natural
33 vegetation and ecological, geological, historical, scenic and archaeo-
34 logical features in portions of existing farms which may be desirable
35 for expanded cultivation in the future.

36 (d) The study shall include an analysis and review of trends, influ-
37 ences and issues affecting farming in the Central Pine Barrens and the
38 potential impacts of these elements on farming in the Central Pine
39 Barrens.

40 (e) The study shall develop and provide a comprehensive vegetation
41 management plan for non-cultivated areas of vegetation within all exist-
42 ing farms in the Central Pine Barrens which, if adopted, would allow the
43 Central Pine Barrens Joint Planning and Policy commission to review
44 potential vegetation clearing and other matters within farms in a
45 comprehensive, panoptic and systematic manner as opposed to on a case-
46 by-case basis.

47 (f) The study shall make recommendations, as and if needed, for amend-
48 ments to the Central Pine Barrens comprehensive land use plan considered
49 necessary as an outgrowth of the study's analysis. The study shall also
50 make recommendations to the towns within the Central Pine Barrens as to
51 code and plan changes, pertaining to land use within the Central Pine
52 Barrens, which should be contemplated, particularly to reduce or elimi-
53 nate conflicts among overlapping regulatory jurisdictions.

54 S 5. Severability. The provisions of this act shall be severable and
55 if any portion thereof or the applicability thereof to any person or

1 circumstances shall be held invalid, the remainder of this act and the
2 application thereof shall not be affected thereby.

3 S 6. This act shall take effect immediately, provided that if nine
4 months after this act shall have become a law, the plan amendment speci-
5 fied in section 57-0122 of the environmental conservation law shall not
6 have been adopted, ratified, and implemented as provided for by section
7 three of this act, this act shall be deemed repealed and of no force and
8 effect. If the plan amendment is adopted, ratified, and implemented, the
9 Central Pine Barrens Joint Planning and Policy commission shall provide
10 an accurate metes and bounds description of the boundaries depicted in
11 the map dated May 2011, as further described in subdivision 11-b of
12 section 57-0107 of the environmental conservation law, as added by
13 section two of this act, and as approved by the Brookhaven town board,
14 to the state legislature within such nine month period. If the state
15 legislature does not approve the metes and bounds description within
16 nine months of their receipt of such description, then this act shall
17 expire and be deemed repealed. The Central Pine Barrens Joint Planning
18 and Policy commission shall notify the legislative bill drafting commis-
19 sion upon the adoption, ratification, and implementation of the plan
20 amendment pursuant to section 57-0122 of the environmental conservation
