In addition to the closure, consolidation or merger of one or more facilities, the commissioner of mental health is authorized to perform any significant service reductions that would reduce inpatient bed capacity, which shall include but not be limited to closures of wards at a state-operated psychiatric center or the conversion of beds to transitional placement programs, provided that the commissioner provide at least thirty days notice of such reductions to the temporary president of the senate and the speaker of the assembly and simultaneously post such notice upon its public website. In assessing which significant service reductions to undertake, the commissioner shall consider data related to inpatient census, indicating nonutilization or under utilization of beds, and the efficient operation of facilities. At least sixty days prior to the anticipated closure, consolidation or merger of any hospitals named in subdivision (b) of section 7.17 of the mental hygiene law, the commissioner of mental health shall provide notice of such closure, consolidation or merger to the temporary president of the senate, the speaker of the assembly and the chief executive officer of the county in which the facility is located, and shall simultaneously post such notice upon its public website. The commissioner shall be authorized to conduct any and all preparatory actions which may be required to effectu-

ate such closures during such sixty day period. In assessing which of such hospitals to close, the commissioner shall consider the following factors: (1) the size, scope and type of services provided by the hospital; (2) the relative quality of the care and treatment provided by the hospital, as may be informed by internal or external quality or accreditation reviews; (3) the current and anticipated long-term need for the types of services provided by the facility within its catchment area, which may include, but not be limited to, services for adults or children, or other specialized services, such as forensic services; (4) the availability of staff sufficient to address the current and anticipated long term service needs; (5) the long term capital investment required to ensure that the facility meets relevant state and federal regulatory and capital construction requirements, and national accreditation standards; (6) the proximity of the facility to other facilities with space that could accommodate anticipated need, the relative cost of any necessary renovations of such space, the relative potential operating efficiency of such facilities, and the size, scope and types of services provided by the other facilities; (7) anticipated savings based upon economies of scale or other factors; (8) community mental health services available in the facility catchment area and the ability of such community mental health services to meet the behavioral health needs of the impacted consumers; (9) the obligations of the State to place persons with mental disabilities in community settings rather than institutions, when appropriate, pursuant to Title II of the Americans With Disabilities Act as interpreted by the United States Supreme Court decision OLMSTEAD V L.C., 527 U.S. 581 (1999); and (10) the anticipated impact of the closure on access to mental health services. Any transfers of inpatient capacity or any resulting transfer of functions shall be authorized to be made by the commissioner of mental health

and any transfer of personnel upon such transfer of capacity or transfer of functions shall be accomplished in accordance with the provisions of section 70 of the civil service law. These appropriations shall be available to facilitate such actions, but shall not be available for the continued operation of such hospitals, facilities or programs designated by the commissioner for closure, unless authorized by the director of the budget for the time period between designation by the commissioner and closure.

Notwithstanding any inconsistent provision of law, this appropriation is not available to support the (a) treatment of the mental abnormality, as that term is defined under article ten of the mental hygiene law, of (1) inmates of state correctional facilities for whom a court has determined that there is probable cause to believe that they are sex offenders requiring civil management under such article but who have not met their maximum expiration date or the conditions of their release to parole supervision, (2) dangerous sex offenders requiring confinement under such article who have failed to meaningfully participate in treatment in a secure treatment facility in violation of their order of confinement, (3) sex offenders requiring civil management under such article who have intentionally violated a material condition of the regimen of strict and intensive supervision and treatment, or (4) dangerous sex offenders requiring confinement under such article who have been found to have intentionally caused physical injury to another person while confined in a secure treatment facility; or (b) annual examinations to evaluate and make determinations of whether sex offenders requiring civil management under such article are currently dangerous sex offenders requiring confinement. Funds shall be available for use of electronic devices for an appearance at any proceeding conducted under such article, by a respondent or any witness upon good cause shown. Funds shall be available

to conduct biennial exams to evaluate and make determinations whether sex offenders requiring civil management under such article are currently dangerous sex offenders requiring confinement. At the discretion of the commissioner of mental health, funds shall also be available to enter into agreements for the provision of care and treatment to persons held at a secure treatment facility pursuant to this article, or for the provision of appropriate security services, by individuals who are not personnel of the office of mental health, the office for people with developmental disabilities, or the department of corrections and community supervision.

Notwithstanding any other provision of law to the contrary, for the purpose of planning, developing and/or implementing the consolidation of administration, business services, procurement, information technology and/or other functions shared among agencies to improve the efficiency and effectiveness of government operations, the amounts appropriated herein may be (i) interchanged without limit, (ii) transferred between any other state operations appropriations within this agency or to any other state operations appropriations of any state department, agency or public authority, and/or (iii) suballocated to any state department, agency or public authority with the approval of the director of the budget who shall file such approval with the department of audit and control and copies thereof with the chairman of the senate finance committee and the chairman of the assembly ways and means committee.

The state comptroller is hereby authorized and directed to loan money in accordance with the provisions set forth in subdivision 5 of section 4 of the state finance law to the mental hygiene patient income account.
