AN ACT to amend the public service law, in relation to requiring a safety and reliability inspection of all telephone poles used by telephone corporations providing telephone service to more than one million subscribers and the replacement or removal of deficient poles

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1     Section 1. Legislative findings. The legislature hereby declares that  
2     unsafe, inadequate or unreliable telephone poles are a danger to the  
3     general public and to telecommunications workers; that such telephone  
4     poles impair the effective delivery of telecommunications services; and  
5     that the public interest requires increased oversight of the safety and  
6     reliability of jurisdictional telecommunications services carried over  
7     or by above ground telephone lines, as such are defined in article 1 of  
8     the public service law; and that the public interest requires a set of  
9     minimum fines to ensure compliance with this statute by each telephone  
10    corporation serving over one million subscribers.

11    S 2. The public service law is amended by adding a new section 98-a to
