AN ACT to amend the environmental conservation law, in relation to enacting the "bird-friendly building council act"

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

- 1 Section 1. Short title. This act shall be known and may be cited as
2 the "bird-friendly building council act".
3 S 2. Legislative findings. The legislature finds that:
4 (a) a federal multi-agency report issued in 2009, entitled "The State
5 of the Birds, United States of America", provides the most comprehensive
6 assessment to date on the status of bird populations;
7 (b) the multi-agency report concludes that nearly one-third of this
8 nation's 800 bird species are endangered, threatened or in significant
9 decline;
10 (c) daytime and nighttime collisions with man-made structures is the
11 most significant quantifiable cause of avian mortality and is increasing
12 with adverse effects being seen at a population level with estimates
13 ranging from several hundred million to one billion birds dying from
14 collisions annually in the United States;
15 (d) not only are birds beautiful, interesting and fascinating crea-
16 tures that are eagerly welcomed by millions of Americans into their
17 backyards every year, but birds also have significant positive impacts
18 on the economies of the United States and New York state;
19 (e) the United States Fish and Wildlife Service has reported that
20 birdwatchers contribute thirty-six billion dollars annually to the econ-

1 omy, and birds naturally provide billions of dollars worth of pest
2 control, benefitting farmers, forestry owners and consumers alike;

3 (f) bird-safe design features can be incorporated into new
4 construction and major renovation projects at no to minimal extra cost;
5 and existing buildings may be made bird-safe through the use of simple,
6 relatively low-cost adaptations;

7 (g) these design features have already been implemented in buildings
8 constructed and renovated both in New York state and throughout the
9 country;

10 (h) numerous municipalities and political subdivisions throughout the
11 country have developed guidelines and standards promoting bird-friendly
12 building design; and

13 (i) under the aegis of the department of environmental conservation
14 there is merit and value to the establishment of a bird-friendly build-
15 ing council whose mission is to undertake a comprehensive analysis and
16 develop a set of recommended responses to this significant wildlife
17 issue.

18 S 3. The environmental conservation law is amended by adding a new
19 section 3-0121 to read as follows:
