AN ACT to authorize the New York state urban development corporation to enter into agreements to develop a Cyber Research Institute

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative Findings. The legislature finds that the issue of securing networked computer systems is of increasing importance. Governments at all levels, including the military, private businesses, and individuals have increasingly become the targets of cyber attacks which range from theft of privileged or proprietary information to destructive efforts to impede or shut down systems which operate key elements of infrastructure, banking and business transactions, or vital functions of government, to name just a few. The increasing demands posed by this threat create a need for research and development in the area of cyber security in an environment which will allow pursuit of these studies in both an open academic setting and, also, in a secure environment for classified research. The United States Air Force Research Lab at Rome, New York is presently conducting important work at its Information Assurance and Cyber Science Technology Laboratory. It is noted that several private businesses are presently engaged in cyber science work in close proximity to the Air Force Research Lab at Rome at the Griffiss Business and Technology Park, and several New York colleges and universities offer undergraduate and graduate programs in cyber science and security. This combination of resources uniquely positions the state of New York to become a leader in cyber security research and development.

S 2. (a) The New York state urban development corporation shall undertake to establish, through public and private partnerships, which shall include the Air Force Research Laboratory at Rome, New York based

EXPLANATION--Matter in ITALICS (underscored) is new; matter in brackets [ ] is old law to be omitted.

LBD15075-03-2

colleges and universities, private businesses, and not-for-profit entities, a Cyber Research Institute to be located at the Griffiss Business and Technology Park in Rome, New York. Such institute shall be an independent not-for-profit corporation organized under the laws of the state of New York. It shall be governed by a board of directors which shall have at least eight and not more than twelve members, no fewer than three-quarters of whom shall be knowledgeable in fields directly related to cyber security or have ongoing engagement and responsibility in the cyber security industry or in industries where cyber security is essential or shall have experience in teaching, research or applied work in the area of cyber security in academic, business or government settings.

(b) The New York state urban development corporation shall work with the collaborating businesses and educational institutions, as well as the Griffiss Local Development Corporation, to ensure that a cooperative working relationship is established between those institutions and potential participants of such research institute so that resources are made available and used in a responsible manner to support the successful development of the proposed research institute and the creation of ongoing linkages between the training, research, development, demonstration and technology transfer resources of the region's higher education institutions, private sector businesses and the activities located at the Griffiss Business and Technology Park.

S 3. This act shall take effect immediately.
