2011-2012 Regular Sessions

I N S E N A T E

January 18, 2011

Introduced by Sen. GOLDEN -- read twice and ordered printed, and when printed to be committed to the Committee on Housing, Construction and Community Development

AN ACT to amend the executive law, the multiple dwelling law and the multiple residence law, in relation to preventing scalding burns by requiring safe temperatures for tap water in multiple dwellings and one-family and two-family tenant occupied dwelling units; and to amend the general municipal law, in relation to minimum water temperatures

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. This act shall be known and may be cited as the "household
2 scalding safety act".
3 S 2. Legislative findings and intent. The legislature hereby finds and
4 declares it necessary to prevent scalding burns by requiring safe
5 temperatures for tap water in multiple-family dwellings and one-family
6 and two-family dwelling units occupied by one or more tenants.
7 Studies have shown that water at 160 degrees Fahrenheit causes full
8 thickness or "third-degree" burns within one second; water at 140
9 degrees causes such burns in six seconds; water at 130 degrees causes
10 such burns in thirty seconds. Shockingly, tap water temperatures hotter
11 than 160 degrees Fahrenheit have been found in homes within the state of
12 New York.
13 The U.S. Consumer Product Safety Commission estimates that nationwide
14 approximately 3,800 injuries and 34 deaths result each year from scald-
15 ing by excessively hot tap water in the home. Children and elderly
16 persons are particularly susceptible to such burns given the delicacy
17 and sensitivity of their skin.
18 Accordingly, the legislature finds it necessary to prevent burns
19 caused by excessively hot tap water by mandating temperature
20 restrictions in multiple-family dwellings and one-family and two-family
21 dwelling units occupied by one or more tenants. The U.S. Consumer Prod-

1 uct Safety Commission has concluded that a safe temperature is 120
2 degrees Fahrenheit in that it would take approximately five minutes for
3 water at such temperature to cause a full thickness burn.

4 The legislature further predicts that such mandated temperature
5 restrictions will lead to decreased utility costs for landlords and will
6 not have any negative impact on the quality of the water. Moreover,
7 implementing these standards will be low in cost to most landlords. Most
8 landlords can comply with these standards by adjusting the thermostat.
9 Others may install anti-scald devices or other certified temperature
10 control mechanisms.

11 S 3. Section 378 of the executive law is amended by adding a new
12 subdivision 17 to read as follows:

13 17. ANTI-SCALD STANDARDS. A. AS USED IN THIS SUBDIVISION, THE TERM
14 "ANTI-SCALD DEVICE" SHALL MEAN A DEVICE WHICH PREVENTS A BATHTUB, SHOW-
15 ER, WASHBASIN, OR SINK FROM EMITTING WATER HAVING A TEMPERATURE IN
16 EXCESS OF ONE HUNDRED TWENTY DEGREES FAHRENHEIT, SUCH AS A TEMPERATURE
17 CONTROL VALVE, A PRESSURE BALANCE VALVE, OR AN ANTI-SCALD VALVE AND
18 WHICH IS EITHER TO BE INSTALLED BEFORE OR WHICH IS AFFIXED TO SUCH
19 FIXTURE. SUCH DEVICE SHALL MEET ONE OF THE ACCEPTED NATIONAL STANDARD
20 PLUMBING CODES: THE BUILDING OFFICIALS AND CODE ADMINISTRATION, INC.

27 DEGREES FAHRENHEIT.

29 ARD IN PARAGRAPH B OF THIS SUBDIVISION SHALL BE IN VIOLATION OF THIS
30 SECTION AND SHALL BE LIABLE FOR A FINE.
