## 2011-2012 Regular Sessions

SENATE-ASSEMBLY

June 9, 2011

- IN SENATE -- Introduced by Sens. LAVALLE, ZELDIN -- read twice and ordered printed, and when printed to be committed to the Committee on Environmental Conservation
- IN ASSEMBLY -- Introduced by M. of A. SWEENEY, THIELE, ENGLEBRIGHT, FITZPATRICK, LOSQUADRO, MURRAY, RAIA -- read once and referred to the Committee on Environmental Conservation
- AN ACT to amend the environmental conservation law, in relation to the addition of certain lands within the Carmans River watershed to the core preservation area of the Central Pine Barrens

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative findings. The Legislature finds that increasing protection for the Carmans River and its watershed as a part of the Central Pine Barrens is a vital goal that benefits the environment and the economy of the state. The Carmans River is one of only two found within the Central Pine Barrens. As such, the Carmans River represents a significant and integral part of the Central Pine Barrens ecosystem.

7 Although various State and local measures have been undertaken to 8 protect the Carmans River over the last several decades, recent scien-9 tific studies have indicated that existing measures are insufficient to 10 protect the Carmans River. Further, the Carmans River is beginning to 11 demonstrate a decline in both the quality of its surface water and its 12 ecological integrity.

The town of Brookhaven has commenced a planning process to protect the Carmans River. The proposed plan is designed to protect and preserve the areas within the Carmans River watershed while also allowing for appropriate economic growth in areas of Brookhaven outside of the Carmans River watershed through the implementation of a transfer of development rights program and the creation of a multi-family district to receive those development rights. This process has also involved the cooper-

ation and participation of the Central Pine Barrens joint planning and 1 2 policy commission. 3 The entire watercourse of the Carmans River lies within the Central 4 Pine Barrens and much of its groundwater watershed also lies within the Central Pine Barrens and entirely within the town of Brookhaven. Accordingly, the most effective means of achieving the objectives of 5 6 7 environmental preservation of the Carmans River watershed and economic 8 growth on other areas of the town of Brookhaven would be to expand the 9 core preservation area of the Central Pine Barrens. 10 As a result, it is proposed to expand the core preservation area boundary to encompass those areas most critical to the Carmans River and to 11 12 include public parklands and open space areas which are near or currently adjacent to the core preservation area and which should be integrated 13 14 into the core preservation area. The Central Pine Barrens Area boundary 15 located south of the Long Island Expressway will also be expanded to be 16 coincident with boundaries of the expanded core preservation area. 17 The expansion of the core preservation area will provide significantly more protection to the Carmans River than currently exists and will help 18 to ensure that key ecological values and habitats will be adequately 19 protected, enhanced and maintained. 20 21 This legislation establishes a process consistent with the ongoing 22 town of Brookhaven planning process that will result in the inclusion of 23 the Carmans River watershed in the core preservation area and the imple-24 mentation of an amendment to the Central Pine Barrens Comprehensive 25 Management Plan to protect the Carmans River watershed. 26 S 2. Section 57-0107 of the environmental conservation law is amended by adding four new subdivisions 10-a, 11-a, 11-b and 15 to read as 27 28 follows: 29 10-A.
