1 used. Rated capacity of a building or an addition shall be determined by  
2 the commissioner based on space standards and other requirements for  
3 building construction specified by the commissioner. Such assigned  
4 capacity ratings shall include, in addition to those spaces used for the  
5 instruction of pupils, those spaces which are used for elementary and  
6 secondary school libraries, cafeterias, prekindergarten instructional  
7 rooms, teachers' conference rooms, gymnasiums [and], auditoriums AND IN

16 existing buildings that, in the judgment of the commissioner, have not  
17 been adequately maintained and have not reached their projected useful  
18 life shall be reduced by the commissioner by an amount proportional to  
19 the remaining unused portion of the useful life of the existing build-  
20 ings, provided however that the commissioner may waive such requirement  
21 upon a finding that replacement of the existing building is necessary to  
22 protect the health and safety of students or staff, that reconstruction  
23 and modernization of the existing building would not adequately address  
24 such health and safety problems, and that the need to replace the build-  
25 ing was not caused by failure to adequately maintain the building. If  
26 the commissioner of labor resets the statewide index reflecting changes  
27 in the costs of labor and materials since July first, nineteen hundred  
28 ninety-two, the commissioner shall adopt regulations to supersede the  
29 basic per pupil allowance of up to six thousand three hundred seventy-  
30 five dollars to the imputed allowance in effect at that time.
