- AN ACT to amend the education law, in relation to the educational preparation for practice of professional nursing

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. The legislature hereby finds and declares that with the 1 increasing complexity of the American healthcare system and rapidly 2 3 expanding technology, the educational preparation of the registered 4 professional nurse must be expanded. The nurse of the future must be 5 prepared to partner with multiple disciplines as a collaborator and 6 manager of the complex patient care journey. Shorter lengths of stays, 7 higher patient acuity, and more sophisticated technologies and proce-8 dures are increasing the complexity of patient care - which in turn 9 places great demands on nursing competencies. Other countries are 10 responding to these changes by requiring the baccalaureate degree as an 11 entry requirement for nursing licensure while other professions are demanding master and doctoral degrees as their entry point. 12 Several 13 recent research studies clearly demonstrate the added value of addi-14 tional education in relation to improved patient outcomes; one study 15 demonstrates that each ten percent increase in the number of baccalau-16 reate prepared nurses results in a five percent decrease in surgical

patient deaths. Therefore, the legislature finds that expanding the 1 educational requirements for the profession of nursing, while maintain-2 3 the multiple entry points into the profession, is needed. inq This 4 legislation affects future nurses graduating from associate degree or 5 diploma nursing programs who would be required to obtain a baccalaureate 6 in nursing within ten years of initial licensure. All current nurses 7 licensed in New York and students in programs preparing for registered 8 professional nursing are to be exempt from the new requirement. This 9 legislation is mirrored after the progressive education requirement for 10 teachers in New York state. Numerous regulatory and accrediting bodies have recommended this change as a means to address sophisticated patient 11 12 care needs resulting from shorter lengths of stay, higher acuity and more sophisticated interventions. This proposal is the result of a grow-13 14 ing body of research evidence that additional education results in 15 better patient outcomes. Therefore by requiring the baccalaureate degree for continued registration as a registered professional nurse this 16 17 legislation seeks to be responsive to meet the increasingly complex health care needs of the residents of New York state. 18

19 S 2. Subdivision 2 of section 6905 of the education law, as amended by 20 chapter 994 of the laws of 1971 and such section as renumbered by chap-21 ter 50 of the laws of 1972, is amended to read as follows:
