FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would amend the Retirement and Social Security Law in relation to heart disease related disabilities and deaths. It would add a "heart presumption" for parole officers, parole revocation specialists and warrant officers in the Department of Corrections and Community Supervision who are designated as a peace officer and are members of the New York State and Local Employees' Retirement System. The presumption would help individuals, or those filing on their behalf, who sustained a job related accident establish that their heart disability or death is the natural and proximate result of such accident. The accidental disability benefit would be 75% of final average salary less worker's compensation.

If this bill is enacted, it could increase benefits from 1/3 of final average salary to 3/4 of final average salary, less worker's compensation. We anticipate that very few members would receive increased benefits under this proposal, since the member, or the person filing on behalf of the member, would have to prove that such heart related disability or death was the result of an accident. The estimated increase in the annual contributions for the State of New York would be approximately \$93,000.

These estimated costs are based on 1,081 members having a total annual salary for the fiscal year ending March 31, 2012 of approximately \$84 million.
