Section 1. Legislative intent. The legislature finds that continuous and appropriate treatment facilitates the best possible outcome for children diagnosed with autism spectrum disorder (ASD). legislature further finds that while periodic reformation of diagnostic criteria is vital to ensure quality care, the legislature and state must be able to respond accordingly if such changes may impact individuals currently receiving treatment. Therefore, the legislature finds it appropriate to establish a council consisting of stakeholders, including parents and physicians, to advise the state and legislature on the implementation and impact of the transition from the fourth edition of the Diagnostic and Statistical Manual of Mental Disorders to the criteimplemented by the fifth edition to ensure that individuals who qualify under DSM-IV will continue to qualify under DSM-5. The legislature further finds that until such time that the state understands the impacts it is important to ensure the continued benefits and services for individuals with a diagnosis.
