Such process must incorporate the 9 10 needs and desires of the local community, with regard to the aesthetic 11 ramifications of such siting. It is the intent of the legislature in adopting the "wireless facility siting act" to implement enabling legis-12 13 lation which specifically sets forth a uniform statewide process for 14 municipal review of applications for the placement, construction and modification of wireless services facilities in all municipalities that 15 do not have local laws to regulate the placement of such towers. 16 Each 17 municipality shall be able to enact approval processes that are more 18 strict than those established by this act.
