- AN ACT to amend the election law, in relation to establishing an instant runoff voting method for certain local elections and providing for the repeal of such provisions upon expiration thereof

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative findings. The current system of voting often 1 2 results in the election of a candidate that does not have the majority 3 support of the electorate when there are three or more candidates running for an elective office. Further, where there are three or more 4 5 candidates for an elective office, voters often will not vote for their б preferred candidate to avoid "wasting" their vote on a "spoiler" candi-7 date. Rather, they will vote against a candidate they dislike, by voting 8 for a leading candidate that they perceive as the lesser of two evils. 9 the current system in multi-candidate races can be the result of The 10 election of candidates that lack majority support.

11 The instant runoff voting method provides for the majority election 12 for elective offices. Instant runoff voting gives voters the option to 13 rank candidates according to the order of their choice. If no candidate obtains a majority of first-choice votes, then the candidate receiving 14 the fewest first-choice votes is eliminated. Each vote cast 15 for the 16 eliminated candidate shall be transferred to the candidate who was the 17 voter's next choice on the ballot. The process is continued until a 18 candidate receives a majority of votes.

A. 2109--A

There are several potential benefits to the instant runoff voting 1 2 method. First, voters are free to mark their ballot for the candidate 3 they truly prefer without fear that their choice will help elect their 4 least preferred candidate. Second, it insures that the elected candidate has true majority support. In addition, the instant runoff voting method 5 6 will (1) promote higher voter turnout, and (2) encourage positive 7 campaigning, since candidates will seek second-choice and third-choice 8 votes from voters and will therefore be less likely to attack other candidates and alienate voters that support other candidates as their 9 10 first choice. In situations where runoffs are already required, it will eliminate the need for a second runoff election, with its increased 11 12 costs and lower voter turnout.

13 The instant runoff voting method has been the subject of increasing 14 interest across the nation. It has already been adopted by local refer-15 enda in California, Vermont, and Massachusetts. It is under consider-16 ation in many other states.

17 It is the purpose of this act to permit the use of the instant runoff 18 voting method on a trial basis in certain local elections at the option 19 of local governments in the years 2014, 2015 and 2016. This pilot 20 program would permit the state legislature to evaluate the broader 21 application of the instant runoff voting method to elections in New York 22 state.
