AN ACT to amend the public health law, the tax law and the state finance law, in relation to providing for taxpayer gifts for lupus education and prevention, and establishing the lupus education and prevention fund and outreach program

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

- 1     Section 1. Legislative intent. The legislature hereby finds the  
2 following:
- 3     (a) Lupus is a serious, complex, debilitating autoimmune disease that  
4 can cause inflammation and tissue damage to virtually any organ system  
5 in the body, including the skin, joints, other connective tissue, blood  
6 and blood vessels, heart, lungs, kidney, and brain.
- 7     (b) Lupus research estimates that approximately one and a half to two  
8 million Americans live with some form of lupus; lupus affects women nine  
9 times more often than men and eighty percent of newly diagnosed cases of  
10 lupus develop among women of childbearing age.
- 11     (c) Lupus disproportionately affects women of color -- it is two to  
12 three times more common among African-Americans, Hispanics, Asians and  
13 Native Americans and is generally more prevalent in minority populations  
14 -- a health disparity that remains unexplained. According to the Centers  
15 for Disease Control and Prevention the rate of lupus mortality has  
16 increased since the late 1970s and is higher among older African-Ameri-  
17 can women.
- 18     (d) No new drugs have been approved by the U.S. Food and Drug Adminis-  
19 tration specifically for lupus in nearly forty years and while current

1 treatments for the disease can be effective, they can lead to damaging  
2 side effects.

3 (e) The pain and fatigue associated with lupus can threaten people's  
4 ability to live independently, make it difficult to maintain employment  
5 and lead normal lives, and one in five people with lupus is disabled by  
6 the disease, and consequently receives support from government programs,  
7 including Medicare, Medicaid, social security disability, and social  
8 security supplemental income.

9 (f) The estimated average annual cost of medical treatment for an  
10 individual with lupus can range between ten thousand dollars and thirty  
11 thousand dollars; for people who have the most serious form of lupus,  
12 medical costs can greatly exceed this amount, causing a significant  
13 economic, emotional and social burden to the entire family and society.

14 (g) More than half of the people with lupus suffer four or more years  
15 and visit three or more physicians before obtaining a diagnosis of  
16 lupus; early diagnosis of and commencement of treatment for lupus can  
17 prevent or reduce serious organ damage, disability, and death.

18 (h) Despite the magnitude of lupus and its impact on individuals and  
19 families, health professional and public understanding of lupus remains  
20 low; only one of five Americans can provide even basic information about  
21 lupus, and awareness of lupus is lowest among adults ages eighteen to  
22 thirty-four -- the age group most likely to develop symptoms of lupus.

23 (i) Lupus is a significant national health issue that deserves a  
24 comprehensive and coordinated response by state and federal governments  
25 with involvement of the health care provider, patient, and public health  
26 communities.

27 S 2. Subdivision 1 of section 207 of the public health law is amended
