AN ACT to amend the education law and the state finance law, in relation to the procurement and use of environmentally sensitive commodities and services

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. Legislative intent. The legislature finds and declares that it shall be the policy of the state of New York to provide every child with an environmentally safe and healthy learning environment in which to grow, learn and mature into productive and healthy adults. The legislature further finds that schools are major consumers and disposers of supplies and materials, and that schools should serve as role models for environmentally responsible behavior with regard to energy conservation, reduced consumption and disposal of toxic and hazardous materials. Children are uniquely vulnerable to and may be severely affected by exposure to chemicals, hazardous wastes and other environmental hazards, which affect their learning abilities as well as create chemical-based responses and sensitivities. When health threats are caused by the presence of toxic materials, the cost to individual school districts and the state are enormous in terms of staff time and effort, cleanup costs, school closing and liability. Therefore, to provide a safe and healthy environment for our children in school, the legislature finds that school districts should be informed of and consider the purchase of environmentally sensitive products and services. It is the purpose of
