- S 2. Legislative intent. The telecommunications revolution is transforming virtually every aspect of American life. Encouraging rapid development of broadband infrastructure, and ensuring the ubiquitous availability of current and next generation broadband capacity, is an urgent priority of the legislature. Increasing the speed at which Americans can access the internet is necessary to ensure the economic expansion of the state of New York. End users from all parts of the state, including urban, rural and low income areas, should be afforded a choice among carriers, high-speed access to a wide array of audio and data applications, and the opportunity to take advantage of the prospects created by the deployment and use of current and next generation broadband facilities. Accordingly, it is appropriate for the legislature to take action to accelerate the deployment of current and next generation broadband capability in the state of New York.
- 17 S 3. The tax law is amended by adding a new section 39 to read as 18 follows:
