AN ACT to amend the general business law, in relation to smart phone device "kill switch"

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative intent. The legislature finds that:

2 (a) According to the Federal Communications Commission (FCC), one in
3 three robberies in the United States involves the theft of a mobile
4 device, making it the number one property crime in the country. Many of
5 these robberies often turn violent with some resulting in the loss of
6 life.

7 (b) The FCC estimates that between thirty to forty percent of United
8 States street theft involves a mobile device. In fact, more than forty
9 percent of all robberies in New York city involve smartphones and other
10 cell phones.

11 (c) Consumer reports projects that 1.6 million Americans had their
12 smartphones stolen in 2012.

13 (d) According to the New York Times, one hundred thirteen smartphones
14 are lost or stolen every minute in the United States.

15 (e) Major cities are home to the highest concentrations of cell phone
16 theft, and officials in New York and California have been pushing for a
17 cellphone kill switch in those states since April 2012. According to New
18 York state attorney general, Eric Schneiderman, the United States Senate
19 proposal would force the mobile industry to "stop dragging its feet and
20 join us in protecting consumers."

21 (f) In April of 2012, U.S. senator Charles Schumer, D-New York, and
22 New York city police commissioner Ray Kelly announced that the major
23 U.S. cell phone carriers and the Federal Communications Commission have
24 agreed to set up a national database to track reported stolen phones.
25 Senator Schumer also introduced a bill called the mobile device theft

deterrence act, which proposes a five-year prison sentence for tampering with the ID numbers of a stolen cell phone.

(g) According to press reports, the international trafficking of stolen smartphones by organized criminal organizations has grown exponentially in recent years because of how profitable the trade has become.

(h) Replacement of lost and stolen mobile devices was an estimated thirty-billion-dollar business in 2012 according to studies conducted by mobile communications security experts. Additionally, industry publications indicate that the four largest providers of commercial mobile radio services made an estimated seven billion eight hundred million dollars from theft and loss insurance products in 2013.

(i) Technological solutions that render stolen mobile communications devices useless already exist, but the industry has been slow to adopt them.

(j) In order to be effective, these technological solutions need to be ubiquitous, as thieves cannot distinguish between those mobile devices that have the solutions enabled and those that do not. As a result, the technological solution should be able to withstand a hard reset or operating system downgrade, and be enabled by default, with consumers being given the option to affirmatively elect to disable this protection.

(k) Manufacturers of mobile devices and commercial mobile radio service providers should make efforts to protect their customers from being targeted as a result of purchasing their products and services.

(l) It is the intent of the legislature to require all smartphones and other mobile devices offered for sale in New York to come with a technological solution enabled in order to deter theft and protect consumers.
