IN ASSEMBLY

May 31, 2016

Introduced by M. of A. MAYER, ROBINSON -- Multi-Sponsored by -- M. of A. LENTOL, SIMOTAS -- read once and referred to the Committee on Health

AN ACT to amend the social services law and the public health law, in relation to establishing the sickle cell treatment act of 2016; and making an appropriation therefor

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. This act shall be known and may be cited as 1 the "sickle 2 cell treatment act of 2016". 3 2. Legislative findings. The legislature hereby finds and declares S 4 the following: 5 (1) Sickle cell disease (SCD) is an inherited disease of red blood 6 cells that is a major health problem in the United States. 7 (2) Approximately 100,000 Americans have SCD and approximately 1,000 8 American babies are born with the disease each year. SCD also is a global problem with close to 500,000 babies born annually with the 9 disease. 10 (3) In the United States, SCD is most common in African-Americans and 11 those of Hispanic, Mediterranean, and Middle Eastern ancestry. Among 12 in 13 newborn American infants, SCD occurs in approximately 1 in 500 African-Americans, 1 in 36,000 Hispanics, and 1 in 80,000 Caucasians. 14 15 (4) More than 3,000,000 Americans, mostly African-Americans, have the sickle cell trait. These Americans are healthy carriers of the sickle 16 cell gene who have inherited the normal hemoglobin gene from one parent 17 18 and the sickle cell gene from the other parent. A sickle cell trait is 19 not a disease, but when both parents have the sickle cell trait, there 20 is a 1 in 4 chance with each pregnancy that the child will be born with 21 SCD. Children with SCD may exhibit frequent pain episodes, entrapment 22 (5) 23 of blood within the spleen, severe anemia, acute lung complications (acute chest syndrome), and priapism. During episodes of severe pain, 24 25 spleen enlargement, or acute lung complications, life threatening 26 complications can develop rapidly. Children with SCD are also at risk for septicemia, meningitis, and stroke. Children with SCD at highest 27

EXPLANATION--Matter in ITALICS (underscored) is new; matter in brackets
[] is old law to be omitted.

1 risk for stroke can be identified and, thus, treated early with regular 2 blood transfusions for stroke prevention.

3 (6) The most feared complication for children with SCD is a stroke 4 (either overt or silent) occurring in 30 percent of the children with 5 sickle cell anemia prior to their 18th birthday and occurring in infants 6 as young as 18 months of age. Students with SCD and silent strokes may 7 not have any physical signs of such disease or strokes but may have a 8 lower educational attainment when compared to children with SCD.

9 (7) Many adults with SCD have acute problems, such as frequent pain 10 episodes and acute lung complications (acute chest syndrome) that can 11 result in death. Adults with SCD can also develop chronic problems, 12 including pulmonary disease, pulmonary hypertension, degenerative chang-13 es in the shoulder and hip joints (bone necrosis), poor vision, and 14 kidney failure.

15 (8) The average life span for an adult with SCD is 45-50 years. While 16 some patients can remain without symptoms for years, many others may not 17 survive infancy or early childhood. Causes of death include bacterial 18 infection, stroke, and lung, kidney, heart, or liver failure. Bacterial 19 infections and lung injuries are leading causes of death in children and 20 adults with SCD.

(9) As a complex disorder with multisystem manifestations, SCD requires specialized comprehensive and continuous care to achieve the best possible outcome. Newborn screening, genetic counseling, and education of patients and family members are critical preventative measures that decrease morbidity and mortality, delays or prevents complications, reduces in-patient hospital stays, and decreases overall costs of care.

27 (10) Stroke in the adult SCD population commonly results in both 28 mental and physical disabilities for life.

(11) Currently, one of the most effective treatments to prevent or treat an overt stroke or a silent stroke for a child with SCD is at least monthly blood transfusions throughout childhood for many, and throughout life for some. This requires the removal of sickle cell blood and replacement with normal blood (exchange transfusion).

34 (12) With acute lung complications (acute chest syndrome), trans-35 fusions are usually required and are often the only therapy demonstrated 36 to prevent premature death.

The legislature declares its intent to develop and establish systemic mechanisms to improve the prevention and treatment of sickle cell disease.

40 S 3. Section 365 of the social services law is amended by adding a new 41 subdivision 13 to read as follows:

13. ANY INCONSISTENT PROVISION OF THIS CHAPTER OR OTHER LAW NOTWITHSTANDING, THE DEPARTMENT SHALL BE RESPONSIBLE FOR FURNISHING MEDICAL
ASSISTANCE FOR PREVENTATIVE MEDICAL STRATEGIES, INCLUDING PROPHYLAXIS,
AND TREATMENT AND SERVICES FOR ELIGIBLE INDIVIDUALS WHO HAVE SICKLE CELL
DISEASE. FOR THE PURPOSES OF THIS SUBDIVISION, "PREVENTATIVE MEDICAL
STRATEGIES, TREATMENT AND SERVICES" SHALL INCLUDE, BUT NOT BE LIMITED TO
THE FOLLOWING:

(A) CHRONIC BLOOD TRANSFUSION (WITH DEFEROXAMINE CHELATION) TO PREVENT
 50 STROKE IN INDIVIDUALS WITH SICKLE CELL DISEASE WHO HAVE BEEN IDENTIFIED
 51 AS BEING AT HIGH RISK FOR STROKE;

52 (B) GENETIC COUNSELING AND TESTING FOR INDIVIDUALS WITH SICKLE CELL 53 DISEASE OR THE SICKLE CELL TRAIT; OR

54 (C) OTHER TREATMENT AND SERVICES TO PREVENT INDIVIDUALS WHO HAVE SICK-55 LE CELL DISEASE AND WHO HAVE HAD A STROKE FROM HAVING ANOTHER STROKE. 1 2

3 TITLE IV 4 PREVENTION AND TREATMENT OF SICKLE CELL DISEASE DEMONSTRATION PROGRAM 5 SECTION 3126. PREVENTION AND TREATMENT OF SICKLE CELL DISEASE DEMON-STRATION PROGRAM. 6

7 S 3126. PREVENTION AND TREATMENT OF SICKLE CELL DISEASE DEMONSTRATION 8 THE COMMISSIONER SHALL ESTABLISH AND CONDUCT A PREVENTION PROGRAM. 1. 9 AND TREATMENT OF SICKLE CELL DISEASE DEMONSTRATION PROGRAM IN THE CITY 10 NEW YORK AND FOR NO MORE THAN FIVE ADDITIONAL COUNTIES, FOR THE OF PURPOSE OF DEVELOPING AND ESTABLISHING SYSTEMIC MECHANISMS TO 11 IMPROVE 12 THE PREVENTION AND TREATMENT OF SICKLE CELL DISEASE, INCLUDING THROUGH:

COORDINATION OF SERVICE DELIVERY FOR INDIVIDUALS WITH SICKLE 13 (A) THE 14 CELL DISEASE; 15

(B) GENETIC COUNSELING AND TESTING;

16 (C) BUNDLING OF TECHNICAL SERVICES RELATED TO THE PREVENTION AND 17 TREATMENT OF SICKLE CELL DISEASE;

(D) TRAINING OF HEALTH PROFESSIONALS; AND 18

19 (E) IDENTIFYING AND ESTABLISHING OTHER EFFORTS RELATED TO THE EXPAN-SION AND COORDINATION OF EDUCATION, TREATMENT, AND CONTINUITY OF CARE 20 21 PROGRAMS FOR INDIVIDUALS WITH SICKLE CELL DISEASE.

22 THE FIRST OF JANUARY, TWO THOUSAND EIGHTEEN, THE 2. ON OR BEFORE COMMISSIONER SHALL REPORT TO THE GOVERNOR, THE SPEAKER OF THE ASSEMBLY 23 24 AND THE TEMPORARY PRESIDENT OF THE SENATE ON THE IMPACT THAT THE 25 PREVENTION AND TREATMENT OF SICKLE CELL DISEASE DEMONSTRATION PROGRAM 26 HAS HAD ON INDIVIDUALS WITH SICKLE CELL DISEASE IN REGARDS TO COORDI-27 NATION OF SERVICE DELIVERY, GENETIC COUNSELING AND TESTING, BUNDLING OF 28 TECHNICAL RELATED TO THE PREVENTION AND TREATMENT OF SICKLE SERVICES CELL DISEASE, TRAINING OF HEALTH PROFESSIONALS AND THE IDENTIFICATION 29 AND ESTABLISHMENT OF OTHER EFFORTS RELATED TO THE EXPANSION AND COORDI-30 NATION OF EDUCATION, TREATMENT, AND CONTINUITY OF CARE PROGRAMS FOR SUCH 31 32 INDIVIDUALS.

33 S 5. The sum of one million dollars (\$1,000,000) is hereby appropriated to the department of health out of any moneys in the state treasury 34 in the general fund to the credit of the state purposes account, not 35 otherwise appropriated, and made immediately available, for the purpose 36 37 of carrying out the provisions of this act. Such moneys shall be payable on the audit and warrant of the comptroller on vouchers certified or approved by the commissioner of health in the manner prescribed by law. 38 39 S 6. This act shall take effect immediately. 40
