35 licensed persons. 1. A mold assessment licensee shall prepare a mold
36 remediation plan that is specific to each remediation project and
37 provide the plan to the client before the remediation begins. The mold
38 remediation plan must specify:

39 (a) the rooms or areas where the work will be performed;

40 (b) the estimated quantities of materials to be cleaned or removed;

41 (c) the methods to be used for each type of remediation in each type
42 of area;

43 (d) the personal protection equipment (PPE) to be supplied by licensed
44 remediators for use by licensed abaters;

45 (e) the proposed clearance procedures and criteria for each type of
46 remediation in each type of area;

47 (f) when the project is a building that is currently occupied, how to
48 properly notify such occupants of such projects taking into consider-
49 ation proper health concerns; the plan must also provide recommendations
50 for notice and posting requirements that are appropriate for the project
51 size, duration and points of entry;

52 (g) an estimate of cost and an estimated time frame for completion;
53 and

54 (h) when possible, the underlying sources of moisture that may be
55 causing the mold and a recommendation as to the type of contractor who
56 would remedy the source of such moisture.

1 2. The REMEDIATION PLAN MAY REQUIRE containment [specified in the
2 remediation plan must], AS APPROPRIATE, TO prevent the spread of mold to
3 areas of the building outside the containment under normal conditions of
4 use.

5 3. A mold assessment licensee who indicates in a remediation plan that
6 a disinfectant, biocide, or antimicrobial coating will be used on a mold
7 remediation project shall indicate a specific product or brand only if
8 it is registered by the United States Environmental Protection Agency
9 for the intended use and if the use is consistent with the manufactur-
10 er's labeling instructions. A decision by a mold assessment licensee to
11 use such products must take into account the potential for occupant
12 sensitivities.

13 S 946. Minimum work standards for the conduct of mold remediation by
14 licensed persons. 1. A mold remediation licensee shall prepare a mold
15 remediation work plan that is specific to each project, fulfills all the
16 requirements of the mold remediation plan developed by the mold assess-
17 ment licensee as provided to the client and provides specific
18 instructions and/or standard operating procedures for how a mold remedi-
19 ation project will be performed. The mold remediation licensee shall
20 provide the mold remediation work plan to the client before site prepa-

35 licensee that the project has achieved clearance as described in section

37 5. Disinfectants, biocides and antimicrobial coatings may be used only
38 if their use is specified in a mold remediation plan, if they are regis-
39 tered by the United States Environmental Protection Agency for the
40 intended use and if the use is consistent with the manufacturer's label-
41 ing instructions. If a plan specifies the use of such a product but does
42 not specify the brand or type of product, a mold remediation licensee
43 may select the brand or type of product to be used. A decision by a mold
44 assessment or remediation licensee to use such a product must take into
45 account the potential for occupant sensitivities and possible adverse
46 reactions to chemicals that have the potential to be off-gassed from
47 surfaces coated with the product.

48 S 947. Post-remediation assessment and clearance. 1. For a remediated
49 project to achieve clearance, a mold assessment licensee shall conduct a

53 (b) all work has been completed in compliance with the remediation
54 plan and remediation work plan and meets clearance criteria specified in
55 the plan.

1 2. Post-remediation assessment shall, to the extent feasible, deter-
2 mine that the underlying cause of the mold has been remediated so that
3 it is reasonably certain that the mold will not return from that remedi-
4 ated area. If it has been determined that the underlying cause of the
5 mold has not been remediated, the mold assessment licensee shall make a
6 recommendation to the client as to the type of contractor who could
7 remedy the source of the mold or the moisture causing the mold.

8 3. A mold assessment licensee who determines that remediation has been
9 successful shall issue a written passed clearance report to the client
10 at the conclusion of each mold remediation project.

11 4. If the mold assessment licensee determines that remediation has not
12 been successful, the licensee shall issue a written final status report
13 to the client and to the remediation licensee and recommend to the
14 client that either a new assessment be conducted, that the remediation
15 plan as originally developed be completed, or the underlying causes of
16 mold be addressed, as appropriate.

17 S 948. Investigations and complaints. The commissioner shall have the
18 authority to inspect ongoing or completed mold assessment and mold reme-
