Introduced by M. of A. CRESPO -- read once and referred to the Committee
on Economic Development

AN ACT to amend the New York state urban development corporation act, in
relation to including kitchen incubators in the New York state busi-
ness incubator and innovation hot spot support act

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEM-
BLY, DO ENACT AS FOLLOWS:

1 Section 1. Legislative intent. The legislature hereby finds that in
2 order to improve economic opportunities for New York state citizens and
3 entrepreneurs, it must use the capabilities of government, business and
4 community based organizations to offer space and resources to the next
5 generation of food manufacturing businesses.
6 One of the chief obstacles for start-up food manufacturing businesses
7 is their inability to access affordable commercial kitchen space.
8 Currently, all over the state, there are only a few kitchen incubators
9 which are facing high demand and are unable to meet the needs of the
10 many potential start-up businesses.
11 Kitchen incubators are a valuable resource for New York state as it
12 moves to promote more job development, business development and
13 increased tax revenues.
14 In New York City alone, there are more than 900 food firms, with over
15 16,000 employees and another 2,500 who are self-employed. This data has
16 been viewed as evidence of entrepreneurs' intent to develop their food
17 manufacturing ideas into full scale production capabilities and fully
18 functional business entities.
19 Minority and immigrant populations are growing significantly through-
20 out the state and so are their number in entrepreneurship activities,
21 including in the development and sale of foods from their native place
22 of origin. This increase in the population of minority and immigrant
23 communities, creates growing demand for such foods.

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets
[] is old law to be omitted.

1 Kitchen incubators housed at select locations throughout New York
2 state will help develop new entrepreneurs and increase the economic
3 benefits of such activities for the entire state.

4 However, New York must do more to propel these business start-ups and
5 potential manufacturers into full scale operations and should move to
6 allow its governmental and non-governmental entities to expand their
7 regional economic catalyst activities to serve entrepreneurs looking to
8 enter the food manufacturing sector. Kitchen incubators should be recog-
9 nized and included within New York state's business incubator program.
