AN ACT to amend the social services law and the public health law, in relation to extending the preferred drug program to medicaid managed care providers and offering the program to other health plans; and to repeal certain provisions of the social services law relating thereto

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS follows:

Section 1. Legislative findings. This legislature finds that the costs of many prescription drugs in the market have been escalating unreasonably. The preferred drug program and the clinical drug review program under the public health law provide effective mechanisms for assuring access to quality, effective and safe drugs to patients at reasonable cost. Providing prescription drugs to Medicaid managed health care provider participants through these programs will maximize the Medicaid program's ability to negotiate more substantial rebates with drug manufacturers (effectively, lower prices), while protecting Medicaid managed care provider participants. Offering non-Medicaid health plans the opportunity to use these programs will help lower costs for those health plans and those who pay their premiums, while protecting individuals covered by those plans, and will also further increase the negotiating power of the programs.

Section 2. The social services law is amended by adding a new section 365-i to read as follows:
