AN ACT to amend the environmental conservation law and the economic development law, in relation to establishing a state geological trail

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1     Section 1. Legislative findings and intent. The state of New York is  
2 distinguished by its unique and multiple geological resources like  
3 Niagara Falls, Letchworth Gorge, and the Adirondack and Catskill parks.  
4 Geological resources give the state special landscapes with considerable  
5 natural, cultural, economic, aesthetic, recreational, touristic and  
6 symbolic importance to the people of the state and visitors to the  
7 state. Geologists played an important role in developing the landscapes  
8 of the state, including the planning of the Erie Canal and undertaking  
9 geological surveys and mapping. The legislature finds that it is time to  
10 recognize the geological resources of the state and to utilize them to  
11 foster conservation awareness and education. Geological resources can be  
12 connected in a trail system that will strengthen the social and economic  
13 well-being of the people of the state. Geological trails can be an  
14 educational resource that will make the outdoors more interesting and  
15 rewarding. Therefore, it is the intent of the legislature to organize  
16 the planners, educators and conservationists to plan and execute the  
17 establishment of geological trails with interpretive features across the  
18 width and breadth of the state.

19     S 2. Article 49 of the environmental conservation law is amended by  
20 adding a new title 5 to read as follows:

21                                    TITLE 5

22                                    STATE GEOLOGICAL TRAIL

EXPLANATION--Matter in *ITALICS* (underscored) is new; matter in brackets
